Saveliy
Middle Android Mobile Developer

SUMMARY

Kotlin

TECHNICAL SKILLS

Main Technical Skills	Kotlin (2 yr.)
Programming Languages	Kotlin (2 yr.)
Android Libraries and Tools	Kotlin (2 yr.)

Task and responsibilities:

- registration, authorization;
- profile display and modification;
- uploading, creating, editing, deleting ads, as well as searching with various filters and displaying on the map;
- chat.

Project Description:

This project is a freelance project where I work independently, control my time, communicate with the customer, as well as with other developers. The client needed an application for the sale of land plots.

VIRONIT | SEPT 2019 - AUG 2021

Role: Android Developer

Task and responsibilities:

- controlling all types of Bluetooth connectivity;
- receiving and displaying data from Bluetooth devices;
- searching by RSSI signal strength;
- registering, displaying and changing the profile, trial period, product purchase, displaying data on Google maps;
- displaying various statistics, collecting and displaying logs, dark theme, and support for multiple languages;
- writing an android application completely from scratch;
- support or bug fixes on other projects.

Project Description:

The first project was related to Bluetooth. Initially, I worked on the project together with the lead, then independently. At the moment, the app is located in the play market and has more than 100 thousand downloads.

The second big project was connected with a smart home and the work was carried out with an international team. The customer already had an iOS version as well as an old android project. The project implemented the possibility of authorization, interaction with various smart home devices, ranging from light bulbs to microwaves. At the moment, the project is still in development.

Programming Languages:

- Java;
- Kotlin;
- SQLite.
