EXPERIENCE

DATABASE & TABLEAU DEVELOPER, DENGAGE

December 2020 - Present
Responsibilities:
- Built 10+ highly customized dashboards for the clients for Marketing and eCommerce data, which helped them to track their campaigns and audience metrics.
- Designed an optimized workflow with Data Sources to achieve the specific target in Data Modelling, saving 70% of the space on the Tableau server.
- Administering the Tableau Server.

QLIK SENSE & TABLEAU DEVELOPER, LEAGUE OF NERDS

November 2019 - December 2020
Responsibilities:
- Upgraded an existing Qlik Sense extension by modifying it in Javascript/Html, which reduced the 50% cost of using the existing paid extension for reporting.

- Developed Finance Reports using that brilliant Extension for their clients, which helped them to analyze their finances to micromanage their expenses and increase revenues.
- Designed multiple Dashboards and customized visualizations in Tableau, for dozens of other clients as well.

SOFTWARE ENGINEER, TALLYMARKS CONSULTING

August 2016 - November 2019
Responsibilities:
- Built 30+ Dashboards and Data Models in Qlik Sense to help clients analyze their data from industries Retail, Distributors, Finance, and Healthcare.
- Created 10+ Personalized Extensions for Qlik Sense using JavaScript/HTML, saving the client's cost to buy other non-personalized extensions.
- Programmed several applications in C# to automate Qlik Sense Processes.
