Volodymyr R.
Senior .NET Software Engineer

SUMMARY

- 7+ years of experience in the IT - Experience in Microsoft technologies — .NET, .NET Core, C#, ASP.NET MVC, ASP.NET Web API, Amazon Web Services, and Microsoft Azure. - Intermediate English - Available from 19.07

TECHNICAL SKILLS

Main Technical Skills	C#, .NET
Programming Languages	C#
.NET Platform	ADO.NET, ASP.NET MVC, ASP.NET Web API, ASP.NET WebForms, Azure, Entity Framework, .NET
Android Libraries and Tools	Android Studio
JavaScript Frameworks	jQuery, React
Salesforce Ecosystem	Salesforce
Databases & Management Systems / ORM	Microsoft Azure SQL Server, Microsoft SQL Server, MongoDB, MySQL, NoSQL, SQLite, SQL Stored Procedures
UI Frameworks, Libraries, and Browsers	Bootstrap, HTML, jQuery
Cloud Platforms, Services & Computing	AWS, Azure, CloudFlare
Azure Cloud Services	Azure Blob Storage, Azure IoT Hub, Azure Table Storage Service, Microsoft Azure SQL Server
Methodologies, Paradigms and Patterns	Agile, eXtreme Programming, Scrum, UML, Waterfall
Platforms	Amadeus, Android, Salesforce
Third Party Tools / IDEs / SDK / Services	Android Studio, Visual Studio, XCode
SDK / API and Integrations	ASP.NET Web API, Facebook API, Google API
Collaboration, Task & Issue Tracking	Atlassian Trello, Jira
Deployment, CI/CD & Administration	Bamboo, TeamCity

Virtualization, Containers and Orchestration	Docker, VmWare
UI/UX/Wireframing	Draw.io
Version Control	Git, SVN
Operating Systems	iOS, macOS, Windows
QA, Test Automation, Security	Selenium Webdriver
Other Technical Skills	Egnyte, Google Apps, HotelBeds, Orion, Sabre, VHDL, Xamarin Studio

EXPERIENCE

.NET Software Engineer, RJL Wealth Management

Tool for private investors to plan retirement income goals using a unique strategy technique, monitoring the plan progress and easily turn to a financial advisor if needed.

Primary responsibilities: Backend development

Key Technologies: ASP.NET MVC 5, ASP.NET Core, EF Core, MS SQL, Azure; APIs: Salesforce, Egnyte, Orion.

.NET Software Engineer, Distributed Cloud System

Distributed cloud system that allows managing access to the Internet by intercepting traffic from end-users devices both mobile and desktop and redirecting it to proxy servers where it is filtered and a decision on allowing or blocking the access is made. The system consists of separate isolated modules that operate as a single integrated system.

Primary responsibilities: Backend development

Key Technologies: ASP.NET Core, EF Core, MS SQL, Azure, NServiceBus

.NET Software Engineer, E-commerce Project

The project introduces an opportunity in selling the next generation of an existing product to new market segments such as small businesses and enterprises, as well as maintaining success on the mid-size segment, by providing any team or organization with a cloud-based multi-tenant workplace web application where they can automate procure-to-pay process and apply any approval and business rules that they need since procurement part is the most popular in the current version of the product.

Primary responsibilities: Backend development

Key Technologies: ASP.NET Core, EF Core, MS SQL, Azure, IdentityServer4; APIs: Stripe.

.NET Software Engineer, Travel Project

The solution for a full cycle of searching, booking, and buying tickets for travelers (air, hotels, car rental).

Primary responsibilities: Backend development

Key Technologies: ASP.NET Core, EF Core, MS SQL, Azure; APIs: Amadeus, Sabre, HotelBeds.

.NET Software Engineer, Social Networks Aggregator

Developing an application for aggregating multiple profiles from different social networks (VK, FB, Mail.RU, Odnoklassniki).

Primary responsibilities: Backend and frontend development

Key Technologies: ASP.NET MVC 5, jQuery, MS SQL, ADO.NET; APIs: VK, Facebook, Mail.RU, Odnoklassniki.

.NET Software Engineer, TestFlight Alternative

Developing services like TestFlight which distributing Android (.apk) and iOS (.ipk) applications. Also, this service has integration with Bamboo.

Primary responsibilities: Backend and frontend development

Key Technologies: ASP.NET MVC 5, jQuery, Entity Framework, MS SQL

.NET Software Engineer, System for Business Process Automation

Developing applications for business process automation of the company.

Primary responsibilities: Backend development, DevOps

Key Technologies: ASP.NET MVC 5, ASP.NET WEB API 2, WCF, ADO.NET, MS SQL, MySQL, MongoDB; APIs: Google Directory API, Google Calendar API, Slack API, Jira API, Biostar, etc; Environment: Git, Bamboo, Jira.

EDUCATION

The Kharkiv National University of Radio Electronics, Master degree in Computer Engineering

2011 – 2017
