Nikita K
Senior Full-Stack Developer

SUMMARY

- He has 6 years of experience with React, 3 years with Node.js, and 1 year with React Native. - Has been constantly working with European and American clients. Two big German projects being as a lead React Developer. - Recent 2 projects were connected with healthcare, where Nikita used React as well as React Native and Node.js. - Quite good with JavaScript in general. English Intermediate+, which is quite enough for communication with the client. - Creating new customer and admin workspaces UI/UX, statistics for NFT marketplace value with Apex charts, new landing pages creation, and introduction of new crypto logic with web3. - Experience in integrating back-end with smart contracts.

TECHNICAL SKILLS

Main Technical Skills	JavaScript, Node.js, React
Programming Languages	JavaScript, TypeScript
JavaScript Frameworks	Express, Node.js, React
JavaScript Libraries and Tools	Redux
Salesforce Ecosystem	Salesforce Apex
Databases & Management Systems / ORM	MongoDB, MySQL, PostgreSQL
UI Frameworks, Libraries, and Browsers	CSS, HTML
Cloud Platforms, Services & Computing	AWS
Methodologies, Paradigms and Patterns	Agile, Scrum
Collaboration, Task & Issue Tracking	Atlassian Trello, Jira
Version Control	BitBucket, Git, SVN
Virtualization, Containers and Orchestration	Docker
Blockchain and Decentralized Software	ETH (Ethereum blockchain), NFT, NFT marketplace, Web3
SDK / API and Integrations	RESTful API

Migraine Buddy

12/2020 – 10/2021

Description: Healthcare app which should help customers with headache diagnostic, and healing and makes communication with the doctor much easier.

Technologies: React, Jest, Enzyme, JavaScript ES6, React Native, RN Testing Lib, Node.js, ExpressJS, Firebase, Redis.

NDA
