EXPERIENCE

Full Stack Engineer, Transformação Digital

Jun 2020 - Present (1 year 9 months +)
Description: Saas focused on online streaming events, I'm responsible for the entire front-end and lead the front-end team. I'm continually contributing to improving a product, discussing new features, and how to improve the software.
Technologies: Javascript (Vanilla, React, Nodejs), Graphql, Mongodb, HTML e CSS

Web Developer, Freelancer

Aug 2017 - Present (4 years 7 months +)
Description: Has a freelancer, my primary contact is with marketing agencies,

where the focus is creating solutions for integrations between software and sites. Often the project is lite solutions, like a quiz, light page builders, or API integrations(like zapier). Another type of project is website creation and problem-solving (helping the client to grow and attract more customers).

Front-end, Pipz Platform

Jul 2017 - Jun 2019 (2 years)
Description: The Pipz is software for marketing automation. with its features, landing pages builder, pipeline(like a kanban board), forms, dashboards, b.i and automation. The most powerful of this software is the automation part, with its feature the user can automate all, Pipz and can communicate with APIs and take the result to use inside Pipz. On the project, I started the migration for React and focused on bug fixing.

Responsibilities: migration Angular to React

Technologies: React
