Hristijan P.
Senior Android Technical Lead

SUMMARY

- I am a self-taught Android developer with a passion for building scalable architecture and writing easily maintainable (deletable) code. - I am a big fan of DI frameworks like Dagger, Anvil, or Hilt. - I build apps out of passion outside of working hours, but lately, I have been exploring Ktor on the backend side and working on fully Compose Android applications. - From time to time, I also like to tinker with Figma. - I am passionate about the latest tech, hardware and security.

TECHNICAL SKILLS

Main Technical Skills	Android

EXPERIENCE

Senior Android engineer, WSAudiology

06/2023 - present
Description: Working on the Foundation team (Bluetooth SDK): architecture decision making, SDK API planning, code reviews, performance optimisations, Compose UI integrations, CI/CD improvements, build performance oversights, security practices. Conducting company interviews for potential Android candidates.

Senior Android engineer and Android technical lead, Tap Mobile

12/2021 - 05/2023 · 1 yr 6mos
Description: Started on the main app Tap Scanner where I implemented the edit document tool from scratch, migrated from Dagger2 to Hilt and from fragment transactions to Navigation Component, proceeded to lead the redesign of the app.
Created full Compose app TapOffice which was abandoned by CEOs decision.
After 1y I started leading the team and proceeded to lead the development of a new fully Compose app PhotoBoost. I was interviewing candidates for the Android position and also participated in the UI/UX decisions with alignment from our iOS colleagues. My last few months were spent leading the development efforts on Walli establishing pain points and refactor plan. Conducted company interviews for potential Android candidates.

Android engineer and Android technical lead, N47

01/2021 - 12/2021 · 1 yr
Description: Worked as an Android engineer, on establishing a new architecture for Sanitas Portal, shortly after 4 months transitioned into technical lead for the client Sanitas and lead the technical team (of 5 Android developers) for the app Sanitas portal at that time it reached 4.7 star rating with more than 100k monthly active users. Conducted company interviews for potential Android candidates.

Android developer, INS Intelligent Network SolutionsINS Intelligent Network Solutions

04/2019 - 12/2020 · 1 yr 9mos
Description: Worked on in-house applications built for the clients such as Adnoc, Prespa2Go, HalkBank, Vodovod Bitola, Green registry of Kavadarci. My activities here as a solo Android developer alongside a solo iOS developer were to bring GEO solutions for each application, meaning Google Maps, Esri SDK and Geo spatial data as a main selling point of the company. Making sure everything is encrypted on the device and on the go.

Internship and junior Android developer, Digital Point : Nearshore Software Outsourcing Partner

09/2018 - 03/2019 · 7mos
Description: After completing my 3 months internship I was hired as a junior Android developer to work on Audit Pro

EDUCATION
