

Alexandr B.

Senior iOS developer

SUMMARY

Highly skilled iOS developer with over 6 years of valuable commercial experience in Swift and Objective-C. With a strong background in mobile app development, has honed his expertise in crafting efficient and user-friendly iOS applications. With attention to details and problem-solving skills, can deliver high-quality applications.

TECHNICAL SKILLS

Main Technical Skills	Objective-C, Swift, RxSwift
Programming Languages	Objective-C, Swift
Mobile Frameworks and Libraries	RxSwift

PROFESSIONAL EXPERIENCE

NEW LINE TECHNOLOGIES, Kharkiv, Ukraine (2017 - present)

Kuvalocal - iOS developer

Mobile application for ordering products from different vendors. Integrated with different services, supports more than 5 payment types. Included portal for Agent, Backoffice, Mobile app.

Team size: 16 members

Technology Stack: CoreLocation, Firebase Cloud Messaging, Alamofire, UIKit, XIBs, Cocoa Pods, FirebaseAnalytics

Kuvacash - iOS developer

Financial solution for African countries (in the beginning). Allow to do all finance operations between users: P2P, Request funds from another user, TopUp via bank account, send transactions outside the country, integration with third-party services, balances, transfers, etc.

Team size: 8 members

Technology Stack: Crypto wallets, CoreLocation, Firebase Cloud Messaging, Alamofire, UIKit, XIBs, Cocoa Pods, FirebaseAnalytics, Keychain

MTC Bank - Team Lead iOS developer

Bank mobile client - getting a loan online, paying for mobile services, utility bills, paying off loans, transferring money to other users.

Team size: more than 50 members

Technology Stack: Swift, Firebase Dynamic Links, Layout by code (SnapKit), Cocoa Pods (single feature as framework unit), JSON, NSCache, Feature toggles, RxSwift, MVVM, Moya, Unit testing (Nimble, SwiftyMocky), Dependency Injection (Swinject)

MTC Connect – iOS developer

The application allows you to make calls over the Internet, use a messenger with support for multimedia content, and use GSM numbers.

Team size: more than 50 members

Technology Stack: Objective-C, Swift, MVVM, reactive, MapKit/YandexMap, Analytics, REST, Socket

Cinemaker Capture – iOS developer

Cinemaker Capture is the companion app to Cinemaker Director Pad. Use Cinemaker Capture on any iOS device as a camera source or audio source into a Cinemaker production.

Team size: 20 members

Technology Stack: AudioToolbox, AVFoundation, MultiPeerConnectivity, OpenGL ES, CoreData, VideoToolbox, RTMP, RTSP, RTP, UIKit, XIBs / Storyboards, CFNetwork, Cocoa Pods, FaceBook API, Youtube API, Dropbox API, Twitter API, LinkedIn API, User Care API

Cinemaker Director Pad – iOS developer

Cinemaker Director Pad is live video production for the next generation. Use your iPad, iPhones and digital cameras to manage your multi-camera video productions. Go Live on YouTube, Facebook, Twitch and others or simply record and Live-Edit with our mobile-easy video production platform. Cinemaker enables easy and extremely fast video content creation by leveraging live production techniques utilized in broadcast TV studios and multi-camera production trucks that cost millions of dollars. Now you can call the shots like the director and have your videos live in minutes versus spending days and weeks in post-production editing.

Team size: 20 members

Technology Stack: AudioToolbox, AVFoundation, MultiPeerConnectivity, METAL, CoreData, VideoToolbox, RTMP, RTSP, RTP, UIKit, XIBs / Storyboards, CFNetwork, Cocoa Pods, FaceBook API, Youtube API, Dropbox API, Twitter API, LinkedIn API, User Care API

Teragence – iOS developer

A framework that allows the application to work in the background for regular network measurements: GSM and WI-FI data, pinger, TCP/UDP download/upload. Sending measurement results to the server.

Team size: 4 members

Technology Stack: SOAP, XML parsing, TCP/UDP socket, Location, Framework creation, background mode

Gear Broker – iOS developer

GEAR.BROKER - “Uber for trucks”

Quebec’s bulk-transport broker app allows you to find owner-operated servicing your area. App connects you with owner-operators in your area without a finder's fee for third party agents – pay for the truck, not the broker. No more “blind dates”. Pick from a list of peer-trusted gear owners.

Team size: 8 members

Technology Stack: Xamarin, UIKit
