Amazon Web Services	AWS Amplify
SDK / API and Integrations	API, RESTful API
Version Control	BitBucket, GitHub, GitLab
Operating Systems	macOS, Ubuntu, Windows
Other Technical Skills	Stylus

EXPERIENCE

Mobile Developer

2019 - now (5 years)

- **Project 1:** Company helping brick-and-mortar retailers provide a level of experience that surpasses online experiences through advanced video analytics.
- **Project 2:** A political microblogging social media app, letting the general public contribute towards various causes by means of donation.
- **Project 3:** Brand management app, that allows store owners and brand managers to collaborate in one place.
- **Project 4:** A marketplace and a social network in one easy-to-use environmentally friendly app that's open to all without gatekeeping.
- **Project 5:** NFT marketplace with social elements and crypto or fiat payments/pay out.
- **Project 6:** HR management tool.
- **Project 7:** User management and notification web & mobile app.
- **Project 8:** Fintech's all-in-one assignment management tool leads teens through a logical step-by-step process of gig creation, assignment, completion, and payment.

Responsibilities:

- Delivering testable, maintainable, and high-quality code
- Taking operational responsibility for the component he developed
- Performing troubleshooting efforts and investigations when necessary
- Providing ongoing support, monitoring, and maintenance of deployed products.
- Coding re-engineering & legacy application enhancement
- Reviewing code & controlling code quality
- Actively working with less experienced software engineers providing technical guidance and oversight.
- Onboarding newcomers on the project
- Providing proactiveness and deep knowledge of the technologies during app development, worked with code refactoring, system optimization, and improvements

Technologies: React Native, TypeScript, Firebase, MobX, Redux, Next.js (for web part), AppCenter (for deploys and updates), Stripe API for payments.

Mobile Developer

2016-2019 (3 years)

- **Project 1:** App for buying airplane tickets(User Profile, Flights history, ability to choose a seat on the plane, meal).
- **Project 2:** Chat app for internal users of the company.
- **Project 3:** App for buying/selling jewelry.

Responsibilities:

- Building robust, performant, highly scalable, flexible solutions
- Participating in the project estimations
- Ensuring high code quality delivered on time
- Working with the documentation of the project.

Technologies: JavaScript, React.js, React Native, HTML, CSS.

Front-end developer

2015-2016 (1 year)

- **Project**: Different Websites, and landing pages for selling products, services, etc.

Responsibilities:

- Participating in the implementation of the releases following the change & management processes
- Collaborating with stakeholders and developers to design and develop new solutions
- Building and deploying services to Apple and Google Store
- Working cross-functionally with a team

Technologies: HTML, CSS, JavaScript, WordPress CMS.
