EXPERIENCE

TABLEAU DEVELOPER, HOMETAP

PRIL 2023 – SEPTEMBER 29, 2023

I thrived in a dynamic role that blended technical prowess with effective communication. Collaborating closely with cross-functional teams. Leveraging my proficiency in Tableau, I designed and optimized dashboards, transforming complex data into actionable insights. Meticulously troubleshooting to enhance functionality, I ensured seamless user experiences. Additionally, I tackled SQL tasks, seamlessly integrating data sources and empowering analyses. This role not only honed my technical expertise but also refined my ability to bridge the gap between concept and execution, driving data-driven decision-making at Hometap.

TABLEAU CONSULTANT, HUDL

JANUARY 2023 – APRIL 2023

As a Tableau consultant working with HUDL to migrate their reports from Looker to Tableau, I was responsible for various tasks related to the transition. My role involved working closely with the HUDL team to understand their current reporting processes and requirements, as well as providing expert guidance on how best to use Tableau to meet those needs. I have used Tableau Desktop, Tableau Cloud, SQL, and Looker.

BI CONSULTANT

2015- 2023

As a Certified Data Visualization Expert and having 8 years of experience, I specialize in creating compelling and impactful stories and dashboards that can help businesses make informed decisions and drive success. My expertise is in Tableau, Power Bi, Python, SQL, Quicksight, Google Data Studio, and Excel.

BI CONSULTANT, WASHINGTON APPRAISAL

2020-2022

I was responsible for developing and maintaining a comprehensive dashboard that tracked the sales performance of our real estate projects. I worked closely with the sales and marketing teams to identify key performance indicators and built customized dashboards that provided insights into sales trends, conversion rates, and customer demographics. This allowed the company to make data-driven decisions and improve sales performance. In addition, I have worked on data modeling, data preparation, and data cleaning.

BI CONSULTANT, MYERS METHODS

2018- 2020

As a Tableau Developer at Myers Methods, the role involves creating visually compelling and interactive dashboards and reports for the real estate domain that provide insights into complex business data. The developer will work closely with clients to understand their data needs and design effective solutions that meet their requirements.
