Artem B.
Middle Flutter developer

SUMMARY

- Experienced Flutter developer with over 6 years of experience in software development.
- Proficient in using Flutter and various related technologies such as Firebase Realtime Database, Firebase Cloud Firestore, Firebase Auth, Google Auth, Facebook Auth, Firebase Cloud Storage, Crashlytics, Analytics, Push Notifications, Background Location, Localization, Google Maps, Stripe, REST API, AWS S3, BloC, MVVM, Flutter Web, and Git flow.
- Strong background in computer science with a Specialist's degree from "O.M.Beketov" National University of Urban Economic and Java Core courses at JavaRush.
- Skilled in both team collaboration and independent work, with a track record of creating applications from scratch and implementing functions according to design requirements.
- Experienced in developing cross-platform mobile applications using Flutter and React-Native.
- Familiar with various development methodologies, principles, paradigms, and patterns.
- Proficient in SDLC and software development practices.
- Strong technical expertise in mobile app development, particularly in the domains of crypto wallets, credit management, Bluetooth device monitoring, housing services management, charity platforms, and location tracking.
- Proven ability to deliver high-quality software solutions and achieve results in a timely manner.

TECHNICAL SKILLS

Main Technical Skills	Flutter (6 yr.)
Mobile Frameworks and Libraries	Crashlytics, Flutter (6 yr.), Flutter Web, Push notifications
Databases & Management Systems / ORM	Firebase Realtime Database
Amazon Web Services	AWS S3
Google Cloud Platform	Firebase Realtime Database
Soft Skills	Analytic Skills
SDK / API and Integrations	Facebook Auth, Google Auth, Google Maps API, RESTful API, Stripe

Third Party Tools / IDEs / SDK / Services	Firebase Auth
Version Control	Git, Gitflow, SVN
Methodologies, Paradigms and Patterns	MVVM
Other Technical Skills	Background Location, Bloc, Firebase Cloud Firestore, Firebase Cloud Storage, Flutter Desktop (Mac OS), Localization

WORK EXPERIENCE

React-Native developer, HaxWallet

Duration: 2018 – present
Summary: Application for managing crypto wallets.
Responsibilities: React-Native developer
Technologies: Expo, Lottie, Firebase API, Background API, etc.

Flutter developer, Under NDA

Duration: 2018 – present
Summary: Cross-platform branded mobile application for clients of the company providing a credit line.
Responsibilities: Flutter developer
Technologies: Flutter, BLoC, Flutter Provider, RxDart, Flutter animations & transitions, Firebase APIs, etc.

Flutter developer, Under NDA

Duration: 2018 – present
Summary: An application for monitoring and visual display of changes in some parameters of a bluetooth device, the ability to change some parameters, and also shares achievements among friends in the application.
Responsibilities: Flutter developer
Technologies: Flutter, BLoC, Flutter Provider, RxDart, Flutter animations & transitions, Reactive updates, BLE, FLutter Blue, Lottie

Flutter developer, OSMD

Duration: 2018 – present
Summary:

- OSMD is a platform for managing housing services
- Includes a mobile application in which users save the readings of counters, read news about the home and leave applications
- Web application for accountant and engineer for processing applications and utilities

Responsibilities: Flutter developer
Technologies: Flutter, Firebase Auth, Firestore, Firebase Push Notifications
Firebase Cloud Storage, BLoC, Flutter Provider, Reactive updates, etc.

Flutter developer, Charidy

Duration: 2018 – present
Summary:

- Charidy - charity platform
- The mission is to empower every individual to create a Better World
- There are web and mobile applications
- Using them a user donates to the campaigns
- Also, there are Donor and Organization dashboards where users are tracking their activities
- The system includes: Web portal, web admin, Mobile app, integration with ApplePay, google pay etc

Responsibilities: Flutter developer
Technologies: Flutter, BLoC, persistence (Moor), non-linear navigation, GraphQL, Material & Cupertino packages, RxDart, Flutter animations & transitions; Flutter Provider, Reactive updates, Flutter Web, Flutter Desktop etc.

React-Native developer, PIFW

Duration: 2018 – present
Summary: An application for bringing together investors around the world.
Responsibilities: React-Native developer
Technologies: TypeScript (React-Native)

Flutter developer, Where I Am

Duration: 2018 – present
Summary: Very easy and fast application for finding the location of user's child, relatives and friends on a map in real time.
Responsibilities: Flutter developer
Technologies: Flutter, Google Maps, Firebase Push Notification, Background tracking Material & Cupertino packages, Flutter animations & transitions; Firebase Cloud Firestore, Firebase Auth, Crashlytics, Analytics, MVVM

JavaScript developer, OutfitStaff

Duration: 2018 – present
Summary:

- Outfit connects clients with waiters, bartenders and service staff
- Hand-pick talent, manage events, and streamline payments and invoicing, all in one place

Responsibilities: JavaScript developer
Technologies: JavaScript (es5), AngularJS, CSS, HTML, Bootstrap, CircleCi, AWS, Crashlytics, Analytics, MVVM, REST API, Stripe

JavaScript full-stack developer, Solera

Duration: 2017 – 2018
Summary: Web application for Solr – open source enterprise search platform, written in Java, from Apache Lucene project.
Responsibilities: JavaScript full-stack developer
Technologies: JavaScript, AngularJS, NodeJs, HTML, CSS, Bootstrap

EDUCATION

- **Specialist's degree**
  "O.M.Beketov" National University of Urban Economic
- **Java Core courses**
  JavaRush
