

# Denis

## Senior Senior Full-Stack Engineer

### SUMMARY

- 5+ years of commercial software development experience;
- Solid experience in building rich web applications (monolith and MSA);
- Deep skills with frameworks and libraries such as React, and Nestjs;
- Good abilities working with Node.js and Express;
- Familiar working with Kubernetes, Docker, and Terraform;
- Experience with AWS ((S3, EC2, AWS SQS/SNS/SES, AWS DynamoDB, IAM, Cloudwatch));
- Most of the development experience was gained in projects related to business corporate networks, coaching platforms, insurance, fintech, leasing, event-management systems, and healthcare;
- Upper-Intermediate English;
- Available: ASAP

### TECHNICAL SKILLS

<b>Main Technical Skills</b>	Node.js, React, JavaScript, TypeScript
<b>Programming Languages</b>	JavaScript, TypeScript
<b>UI Frameworks, Libraries, and Browsers</b>	Ant Design, Chart.js, CSS, HTML, Material UI, SCSS
<b>JavaScript Libraries and Tools</b>	ES6, Mobx, Mongoose, React Hooks, React Router, React Testing Library, Redux, Redux-Saga, Vite, Webpack, Winston
<b>JavaScript Frameworks</b>	Express, NestJS, Node.js, React
<b>AI &amp; Machine Learning</b>	TensorFlow
<b>Python Libraries and Tools</b>	TensorFlow
<b>Databases &amp; Management Systems / ORM</b>	AWS DynamoDB, MongoDB, MySQL, PostgreSQL, Sequelize, Typeorm
<b>Amazon Web Services</b>	AWS API Gateway, AWS CloudWatch, AWS DynamoDB, AWS EC2, AWS IAM, AWS Lambda, AWS RDS (Amazon Relational Database Service), AWS S3, AWS SES (Amazon Simple Email Service), AWS SNS, AWS SQS

<b>Methodologies, Paradigms and Patterns</b>	Agile, Scrum
<b>Collaboration, Task &amp; Issue Tracking</b>	Atlassian Trello, Jira, Redmine
<b>SDK / API and Integrations</b>	AWS API Gateway, Context API, GraphQL, JWT, RESTful API, Swagger, Web API
<b>Version Control</b>	BitBucket, Git, GitHub, GitLab
<b>Mail / Network Protocols / Data transfer</b>	CORS, HTTP, JWT
<b>QA, Test Automation, Security</b>	Cypress, Jest,nock, React Testing Library
<b>Virtualization, Containers and Orchestration</b>	Docker, Kubernetes, Terraform
<b>Third Party Tools / IDEs / SDK / Services</b>	Microsoft Visual Studio Code, WebStorm
<b>Scripting and Command Line Interfaces</b>	XSS

## EXPERIENCE

### Fullstack JavaScript Developer

October 2017 - present

## PROJECTS

### Fullstack developer, NDA

2 years (November 2020 - October 2022)

**Description:** The symptom management system that helps companies and educational institutions to reopen, be ahead of the COVID curve, and protect people from infectious diseases, a tool that helps create and sustain a safe environment at work and in school, manage the business processes to reduce the risks of suspending work, and arrange for the community's safety.

#### Responsibilities:

- Designing and building services architecture, updating and building new microservices;
- Implementing new UI features for the client application;
- Building features from scratch as a full-stack feature (from FE to BE and infrastructure if needed).

**Technologies:** NodeJS, NestJS, PostgreSQL, TypeORM, React, AWS services (S3, EC2, AWS SQS, Lambda, API Gateway).

### **Full Stack Developer, NDA**

7 months (April 2020 - October 2020)

**Description:** It is a comprehensive telehealth Software as a Service (SaaS) solution that combines our Online Medical Suite with clinical patient data and diagnostic medical workflow that enables patients and doctors to perform consultations similar to face-to-face consultations.

#### **Responsibilities:**

- Business logic implementation, estimating features, designing features;
- Performed software development: develop backend, develop frontend, cover with tests

**Technologies:** NestJS, Postgres, React, Redux, Redux-Saga, Redux-Toolkit, Reselect, React Router, Vite, Lodash, GCP.

### **Full Stack developer, Time Management system**

5 months (November 2019 - March 2020)

**Description:** The system helps users to log work time every day. The application contains three different types of roles user, admin, and super-admin. Users can create tasks and log time, and change profile information. Admin can create projects, assign customers, see analytics of logged time, update users' profile information, and invite users under their own company. Super admin manages companies.

#### **Responsibilities:**

- Business logic implementation, estimating features, designing features. Performed software development: develop backend, develop frontend, cover with tests

**Technologies:** React, Redux, Redux-Saga, Node.js, NestJS, Express.js, Typescript, Jest, GCP.

### **Full Stack Developer, NDA**

9 months (March 2019 - November 2019)

**Description:** Cloud-based payroll solution for small and mid-sized companies to manage payroll around the world.

#### **Responsibilities:**

- Designing the app structure and architecture of an application, estimating features, and designing features;
- Performed software development: develop backend and frontend parts of the project.

**Technologies:** Node.js, Postgres, NestJS, React, Redux, Redux-saga, Typescript, Jest, AWS (RDS, AWS SNS/SES, IAM, Cloudwatch).

### **Full Stack Developer, Make a band!**

8 months (July 2018 - February 2019)

**Description:** A system that helps musicians to communicate, make bands, and

look for musicians.

**Responsibilities:**

- Estimate features, design features, and develop backend and frontend parts.

**Technologies:** Node.js, NestJS, Postgres, React, Redux, Redux-Saga, Redux-Thunk, React-Query, GCP.

**Full Stack Developer, A platform for volunteer organizations**

9 months (October 2017 - June 2018)

**Description:** Retailers can make digital twins of physical products for consumers to experience remotely

**Responsibilities:**

- Development of website and mobile application

**Technologies:** Node.js, NestJS, React, Redux, Redux-Saga, React Router, AWS (S3, EC2, AWS SQS/SNS/SES, AWS DynamoDB, IAM, Cloudwatch).

**EDUCATION**

**Master's degree, Computer Science**

National University of Radio Electronics

2013 - 2017
