

Yevhenii K.

Front-End Engineer

Front-End Web

Profile

- I`m a skilled Front-end Developer with 3 years of commercial experience, I delivered a diverse range of successful projects most of them developed from stage planning architecture to production ready.
- My biggest achievements include rewriting an old legacy project that was used by hundreds of thousands of users worldwide, into the most modern technology stack available at the time, developing high-performing web applications with intuitive user interfaces, and optimizing website SEO performance to improve Google search ranking.
- I possess excellent communication, a keen eye for detail, and a passion for staying up-to-date with emerging technologies in the field.
- Upper-Intermediate English
