

Petr Iv.

Middle Front-end Developer

SUMMARY

- 5+ years of commercial experience in IT - Experience in developing web applications using JavaScript (React, Redux) - Deep knowledge of HTML, CSS, TypeScript - New functionality development - Communicative, responsible, hardworking, result-oriented - Experience from simple sites to huge projects for companies - Good attention to details - Good logical thinking and team play - Intermediate+ English. - Availability starting from ASAP.

TECHNICAL SKILLS

Main Technical Skills	JavaScript, React
Programming Languages	JavaScript, TypeScript
JavaScript Frameworks	Next.js, Node.js, React
JavaScript Libraries and Tools	React Native, Redux, Redux-Saga, Redux Thunk, Redux-toolkit
Databases & Management Systems / ORM	Firebase, MongoDB
UI Frameworks, Libraries, and Browsers	Ant Design, CSS, HTML, SASS, Tailwind CSS
Methodologies, Paradigms and Patterns	Agile, Kanban, Scrum
Third Party Tools / IDEs / SDK / Services	Algolia
QA, Test Automation, Security	Cypress
Platforms	Firebase
Version Control	Git, GitHub, GitLab
SDK / API and Integrations	Git API, GraphQL, RESTful API
Collaboration, Task & Issue Tracking	Jira
Operating Systems	macOS, Windows

EXPERIENCE

Javascript Developer

March 2021 - Present

Javascript Developer, Freelance

January 2018 - December 2020

PROJECTS

Full-stack development

Sept 2022 – July 2023

Description: The project is related to building. User can create different types of documents, get reports, upload documents and see statistics.

Responsibilities: Implemented a new functionality to add drawings attachments, select elements and create markups. Bug fixing. Communicating with the client. Help the mobile development team to implement the functionality of viewing drawings and working with them.

Technologies: React, Typescript, Git, GraphQL, RestApi, Cypress, Node.js, Autodesk Forge, Ant Design

Front-end development

Feb 2022 - Sept 2022

Description: An application for writing test cases and a flexible description that is synchronized with the project. My basic tasks included creating a responsive user interface with the creation of the functionality of the Git Api and Firebase, including the Algolia search library.

Responsibilities: Creating a layout based on UI component style libraries. Developing application logic (working with API, dynamic component mapping, forms and their validation, data caching). Refactoring components and change logic. Fix bugs and improve productivity. Conducting code reviews. Communication with the client.

Front-end development

Jan 2022 – Feb 2022

Description: The project is related to the repair of roads in the United States. Created to account for materials, working hours of employees.

Responsibilities: Designing forms and testing them, modifying user interface based on criteria, working with print layout, creating user interface. Refactoring components and change logic. Fix bugs and improve productivity.

Technologies: Meteor, React, Redux, Redux Toolkit, Git, Jenkins

Front-end development

Sept 2021 – Jan 2022

Description: Platform for retail likes and comments in social medias. It helps people to make their accounts popular. It has the landing page and comfortable admin management for calculating and ordering.

Responsibilities: Designing forms and testing them, modifying user interface based on criteria, working with print layout, creating user interface. Refactoring components and

change logic. Fix bugs and improve productivity.

Technologies: React, Redux, JavaScript, HTML, CSS, Git, SaSS, React-Router-Dom

Front-end development

May 2021 - Sept 2021

Description: The system stores user data from laboratories and from doctors. A reminder system notifies you of the need for scheduled tests or a doctor's appointment, analyzes are analyzed and specialized specialists are offered as needed.

Responsibilities: Code refactoring. Optimising web pages for maximum speed and scalability. Adding new functionality to the current working project. Design mobile-based features. Collaborate with back-end developers and web designers to improve usability. Help back-end developers with coding and troubleshooting. Maintain and improve the website

Technologies: React, Redux, Redux-Thunk, Material UI

Front-end development

Jan 2021 - May 2021

Description: A website for viewing information about sports and sports-related events, helping the user to find and save information of interest.

Technologies: JavaScript, React, Redux-Thunk

Front-end development

Aug 2020 - Jan 2021

Description: Creation of a site for viewing football matches of Chilean teams.

Technologies: JavaScript, HTML, CSS

Front-end development

Apr 2020 - Aug 2020

Description: A program for tracking the working day of an employee with the ability to register in the system and monitor those who do not visit the office.

Technologies: JavaScript, React, Redux think

Front-end development

Dec 2019 - Apr 2020

Description: A website for viewing news and events, with the ability to select topics and sources of interest.

Technologies: JavaScript, HTML, CSS

Front-end development

Jan 2018 - Dec 2019

Description: Online store for the sale of fishing equipment and other accessories.

Technologies: JavaScript, HTML, CSS

EDUCATION

Masters degree, Kharkiv National University of Radio Electronics

2022 - Present

Masters degree , Petro Vasylenko Kharkiv National Technical University of Agriculture

2014 - 2016
