Eugene Ch
Expert Full Stack Wordpress Developer

SUMMARY

A well-rounded Full Stack WordPress Developer with extensive experience encompassing over a decade in PHP and JavaScript, complemented by proficiency in front-end technologies like React.js, Vue.js, Svetle.js, and Gatsby.js. Proficient in integrating APIs and developing WooCommerce plugins, the engineer has a hands-on approach to custom WordPress theme optimization, demonstrating a strong understanding of both back-end and front-end development. With significant experience leading development teams and contributing to SDLC, coding standards, and automated quality checks, this candidate brings a wealth of knowledge in computer systems from their formal education. The engineer is skilled in deploying Next.js with WordPress as a Headless CMS, evidenced by successful project completions with complex integrations, and possesses a keen ability to seamlessly introduce new functionalities and fix underlying issues in pre-existing applications.
