

Dusan Nikolic

Senior Frontend Developer

SUMMARY

Software engineer with a strong focus on frontend development utilizing modern frameworks such as Angular, React, and Next.js with proficiency in TypeScript. Demonstrates expertise in creating scalable and maintainable web applications with a history of improving codebases adhering to SOLID principles and optimizing for performance to achieve high Lighthouse scores. Established a record in implementing white-label solutions, UI component libraries, CI/CD pipelines with Docker, and comprehensive test coverage with Cypress. Brings experience in technical leadership, including guiding teams and enhancing product accessibility standards. Holds an education in Information Systems and Technologies, communicating fluently in English and Serbian as part of an international collaborative environment.

TECHNICAL SKILLS

Main Technical Skills	Angular (4 yr.), React (1 yr.), Next.js (1 yr.), TypeScript (4 yr.), Angular Material UI
Programming Languages	TypeScript (4 yr.)
JavaScript Frameworks	Angular (4 yr.), Next.js (1 yr.), React (1 yr.)
JavaScript Libraries and Tools	Formik, Zod, Zustand
Java Libraries and Tools	Java SE
UI Frameworks, Libraries, and Browsers	Angular Material UI, HTML, SASS, Storybook
Methodologies, Paradigms and Patterns	Agile (2 yr.)
Deployment, CI/CD & Administration	CD DevOps pipelines (1 yr.)
UI/UX/Wireframing	Figma
Other Technical Skills	CSS/SCSS

I have worked in an international environment on Austrian Post business solutions, collaborating with Austrian colleagues on a wide range of projects. My experience includes handling technical debt, rewriting legacy Angular applications into modern React codebases, presenting progress and results to stakeholders within agile workflows, configuring Docker and CI/CD pipelines, as well as onboarding and mentoring new team members.
