Denis Y.
Full-Stack Developer

Full Stack Web, Back-End Web

Profile

An adept Full-Stack Developer with over 10 years of experience, specializing in creating robust web applications using front-end and back-end technologies. Holds a Master's degree in Computer Applications with a focus on software development for automated systems. Proven expertise in JavaScript, React, Next.js, Redux, Thunk, jQuery, PHP, Laravel, and various UI technologies, including MUI, HTML5, CSS3, along with MySQL and AWS services. Demonstrated ability to integrate third-party APIs and ensure optimal application performance. Well-versed in agile methodologies and version control using Git. Has a track record of successful project execution in collaborative team settings as well as independent roles, marked by strong problem-solving skills and attention to detail.
