UI Frameworks, Libraries, and Browsers	jQuery
SDK / API and Integrations	API, Google Maps API, Hubspot API, RESTful API
Version Control	BitBucket, GitHub
Methodologies, Paradigms and Patterns	FDD
UI/UX/Wireframing	Responsive Design
Platforms	sendgrid

WORK EXPERIENCE

Full-Stack Developer, NDA

Duration: April 2024 - August 2024
Summary: An innovative platform for distributors to order jewelry directly from manufacturers, providing CRM systems for order management and enhanced customer interactions.
Responsibilities: Participated as a full-stack developer, handled third-party API integrations, ensured application performance, and worked with teams to coordinate project management.
Technologies: JavaScript, ReactJS, MUI, Google Maps API, PHP 8.2, Laravel 11, Nginx, MySQL, Redis, SendGrid, AWS: RDS, EC2, S3

Full-Stack Developer, Hagedoo.de

Duration: December 2021 - March 2024
Summary: A platform merging customers with local professionals for repair jobs, featuring an admin panel, in-built chat, and integration with Hubspot CRM.
Responsibilities: Worked on bug fixing and new feature development, managed deployments to staging and production environments, and wrote E2E tests for the frontend.
Technologies: MySQL, Laravel, Next.js, Redux, Saga, Thunk, Redis, Stripe

Full-Stack Developer, Tymeshift

Duration: October 2019 - Nov 2021
Summary: Involved in the new functionality development, code refactoring, statistical sampling, and implementing a new algorithm for employees' working hours planning.
Responsibilities: Participated as a full-stack developer, worked on transitioning from Yii 2 + jQuery to Laravel + React, and developed a Chrome plugin for URL tracking.
Technologies: Yii 2, Laravel, React, jQuery, Bootstrap, MySQL, AWS

Full-Stack Developer, involve.asia

Summary: An advertising platform that connects advertisers with users who have a large following to post promotional content.
Responsibilities: Took part in the project development from scratch as a full-stack developer, developed multiple modules and implemented enhancements throughout the admin area.
Technologies: Laravel 5.2, Redis, Supervisor, external APIs, HTML5/CSS3, jQuery, responsive design

Backend Developer, fantasy.nrl.com and fantasy.afl.com.au

Summary: Backend development for 'Fantasy football' platforms for AFL and NRL, with a focus on real-time data and user interaction.
Responsibilities: Acted as a backend developer, developed the calculation core for the system, managed rankings, and processed large amounts of data in real-time.
Technologies: PHP7, MySQL, Angular JS, Laravel Framework, RESTful API

EDUCATION

- **Master of Computer Applications (M.C.A.)**
  Software development for automated systems.
  1999-2004
