

Vivek Papnai

Senior Senior Go Developer

SUMMARY

Accomplished Senior Go Developer with over 5 years of experience in building robust backend systems. Proven expertise in working with technologies such as Golang, Kubernetes, Kafka, and Docker. Capable of handling databases like Postgres, alongside optimizing the use of Restful APIs, Microservices, and cloud platforms AWS and GCP. Track record includes pivotal contributions to large-scale projects like 'AxleApi' in the Logistics sector and innovative platforms like 'ConnectUp' for professional networking. Leverages strong coding practices, deployment skills, and CI-CD integration to enhance software performance and scalability. Recognized for mentoring peers and leading by example to drive project successes.

TECHNICAL SKILLS

Main Technical Skills	Go (5 yr.), microservices (5 yr.), Kubernetes (5 yr.), Kafka (5 yr.)
Programming Languages	Go (5 yr.)
Message/Queue/Task Brokers	Kafka (5 yr.)
Virtualization, Containers and Orchestration	Kubernetes (5 yr.)
Methodologies, Paradigms and Patterns	microservices (5 yr.)

WORK EXPERIENCE

Senior Golang Developer, AxleApi

Duration: 2 years

Summary: A telematic data aggregation platform aimed at optimizing deliveries and improving driver careers through technology.

Responsibilities: Writing optimized code, mentoring team members, detailed PR reviews, handling integrations, and implementing new solutions.

Technologies: Golang, Fiber, GORM, RPC, AWS, Postgres

Senior Golang Developer, Panasonic emobility

Duration: 1 year 1 month

Summary: A platform enhancing the user experience for secondary transport with e-vehicles, while adopting green energy.

Responsibilities: Architecting from scratch, implementing microservices, designing feature flows, creating MapMyIndia API wrappers.

Technologies: Golang, MapMyIndia, Redis, Kafka, Fortify, MongoDB

Golang Developer, ConnectUp

Duration: 2 years

Summary: A networking platform for professionals to connect, discuss ideas, find investments, and engage in VR-enabled meetings.

Responsibilities: Developing, testing and maintaining codebase, researching new feature solutions, proving concept for enhancements.

Technologies: Golang, Rest, AWS, Docker, Kubernetes, Microservices, Kafka, Redis, Postgres, Chi

Golang Developer, YourDaily

Duration: 6 months

Summary: An e-commerce initiative for delivering fruits and vegetables online, with a focus on analytics for the admin panel.

Responsibilities: Developed the admin panel for analytics and statistics, managed backend integrations.

Technologies: Golang, Redis, Docker, Kubernetes, Postgres
