

ROR

Senior Senior Developer

SUMMARY

Software engineer with 6 years of application development expertise in PHP 5.x and RoR frameworks, fortified by a robust foundation with an MCA in Computer Applications and a B.Sc in Computer Science. Demonstrates proficiency in a diverse stack including PHP, Ruby, MySQL, POSTGRES, JavaScript, Ajax, CSS, and mastery of frameworks such as Codeigniter, CakePHP, and Rails, as well as CMS like Drupal. Exhibits strong analytical and project management skills complemented by a history of driving full SDLC for a variety of projects like Photobin, YFE, iSafeTalk, and iQGlobal. Leverages version control systems such as SVN and GIT, development tools like Dreamweaver, and proficiency in Linux and Apache to deliver robust applications. Excels in collaborative environments, showing seasoned leadership in guiding technical team members and a track record of technical problem-solving and innovation.

TECHNICAL SKILLS

Main Technical Skills	PHP (6 yr.), Ruby (6 yr.), JavaScript (6 yr.), MySQL (6 yr.), PostgreSQL (6 yr.)
Programming Languages	JavaScript (6 yr.), PHP (6 yr.), Ruby (6 yr.)
UI Frameworks, Libraries, and Browsers	Ajax, DHTML, HTML
AI & Machine Learning	AWS SageMaker (Amazon SageMaker)
PHP Frameworks	CakePHP, CodeIgniter
Ruby Frameworks	Ruby on Rails
Databases & Management Systems / ORM	MySQL (6 yr.), PostgreSQL (6 yr.)
Amazon Web Services	AWS SageMaker (Amazon SageMaker)
Web/App Servers, Middleware	Apache HTTP Server
Platforms	Drupal
QA, Test Automation, Security	TestRail

Other Technical Skills	Adobe Dreamweaver, GPO (Group Policy Object), Sitecore
-------------------------------	--

WORK EXPERIENCE

Developer, Photobin

Duration: 2 Months

Summary: Photobin is a site for professional photographers to manage their photos and albums, with features such as 2D and 3D image viewers, friend requests, and invitations.

Responsibilities: Coding for functionality

Technologies: Rails 2.2.2, Ruby 1.6, MySQL, Sproutecore, AJAX, ImageMagick

Developer, YFE

Duration: 4 Months

Summary:

- YFE is a multi-language site for a rock band with a store, community, and CMS section
- Features include blogs, videos, audio integration, and e-commerce capabilities with international currency support

Responsibilities: Coding for functionality, Analysis of requirements, Technically guide to other team members, Database creation

Technologies: Rails 2.3.3, Ruby 1.8, MySQL, AJAX, ImageMagick

Developer, iSafeTalk

Duration: 2 Months

Summary: iSafeTalk is a social networking site for the education sector, facilitating communication between teachers, schools, and students with features like instant messaging, homepage creation, and event management.

Responsibilities: R&D on Drupal, Coding for two modules for admin side, integrate the chat module, Database creation, Bug fixing

Technologies: Drupal, PHP5.2, Linux, MySQL, AJAX

Developer, iQGlobal

Duration: 4 Months

Summary: iQGlobal is an automation project for a logistics company, providing a customer interface for global export services, including sea and air freight.

Responsibilities: Coding for functionality, Database creation

Technologies: PHP5.2, Linux, MySQL

Developer, TNT Fitness System

Duration: 3 Months

Summary: TNT Fitness System is a platform designed for weight management goals, with different interfaces for users, staff, and admin providing personalized meal and calorie plans.

Responsibilities: Coding for functionality, Database creation

Technologies: PHP5.2, Linux, MySQL, AJAX

Developer, KALIPAREA

Duration: 4 Months

Summary: KALIPAREA is a social networking site similar to Facebook, including friend requests, messages, events, and a news feed.

Responsibilities: Coding for functionality, R&D on Codeigniter, Database creation, Technically guide to other team members

Technologies: Codeigniter, Linux, Mysql, AJAX

Developer, KUZUKA

Duration: 1 Month

Summary: KUZUKA is a carbon marketplace with features like a carbon footprint calculator and a system for supporting environmental projects through donations.

Responsibilities: Coding for functionality

Technologies: PHP5.2, MySQL, AJAX

Developer, iQglobal SeaFreight

Duration: 4 Months

Summary: iQglobal SeaFreight is an automated system for a logistics corporation to manage sea freight operations, designed to replace an older PHP system with a Ruby on Rails based system.

Responsibilities: Coding for functionality, Database creation, R&D on Ruby on Rails, Technically guide to other team members, Analysis of requirements

Technologies: Rails 2.2.2, Ruby 1.6, MySQL, AJAX

Developer, MyAddressBar

Duration: 1 Month

Summary: MyAddressBar (MAB) is a search engine that helps users find websites by name or domain, featuring an admin part for site management.

Responsibilities: Coding for functionality, Database creation

Technologies: Rails 2.3.3, Ruby 1.8, MySQL, AJAX, ImageMagick

Developer, SubYT

Duration: 2 Months

Summary: SubYT is a monitoring tool for tracking the popularity of a YouTube channel, presenting data on friends, views, and subscribers in a graphical format.

Responsibilities: R&D on CakePHP, Technically guide to other team members, Database creation

Technologies: CakePHP, PHP5.2, Linux, MySQL, AJAX
