

Hovhannes (John) Baghdasaryan

Software Engineer

SKILLS

| | |
|---|---|
| Main Technical Skills | Node.js, JavaScript, TypeScript, React, Express |
| UI Frameworks, Libraries, and Browsers | HTML5, Tailwind CSS |
| JavaScript Frameworks and Libraries | NestJS, Next.js |
| Databases & Management Systems / ORM | Airtable, MongoDB, MySQL, PostgreSQL, Prisma, Typeorm |
| Amazon Web Services | AWS Amplify, AWS Lambda, AWS SDK |
| Deployment, CI/CD & Administration | CI/CD |
| Virtualization, Containers and Orchestration | Docker |
| Version Control | Git |
| Methodologies, Paradigms and Patterns | REST |
| Mail / Network Protocols / Data transfer | WebSockets |
| Other Technical Skills | CSS3, Google Cloud Platforms, Tailwind UI |

Frontend Developer *Saltatech 06/2021 - 02/2022*

- Proficient in building user-friendly web applications with React.js.
- Expertise in unit testing ensuring reliable working code through test coverage and validation.
- Turned designs into easy-to-use websites, showing teamwork skills with technical know-how.

Backend Developer *CLEVIT 02/2022 - 03/2023*

- Proficient in deploying applications on Google Cloud Platform, demonstrating expertise in cloud infrastructure management.

- I smoothly added Stripe's payment system into our platform.
- Proficient in Google Cloud functions and Cloud Task Services.

Full-Stack Developer *Direlli* 03/2023 - Present

- Designed and deployed scalable serverless applications using AWS Lambda, Amplify, AppSync, Cognito and DynamoDB.
- Led the development of dynamic and responsive user interfaces with React, JavaScript and TypeScript, efficiently utilizing Storybook for seamless component-driven development.

Gained hands-on experience with Nest.js, demonstrating my ability to quickly learn and apply new technologies with ease.

TOP PROJECTS

Email Doodle (06/2021 - 02/2022)

- As the team lead I've provided mentorship and leadership to my team.
- Engineered Email Doodle project infrastructure using ReactJS,
- NodeJS, NestJS seamlessly integrating AWS services including S3, SQS, SES.

Website - <https://email-doodle.web.app>

TheFlowOps (03/2022 - 03/2023)

- Successfully implemented GCP Container Registry for efficient and streamlined deployment of containerized applications.
- Proficient in leveraging RevenueCat for seamless integration and management of subscription services within mobile applications.

Website - <https://www.theflowops.com/>

EDC Squared (03/2023 - 06/2024)

- Implemented serverless solutions by leveraging AWS best practices to create scalable and efficient infrastructure.
- Focusing on collaboration, mentoring and clear communication, utilizing modern user-friendly solutions into delivering high-quality, responsive web applications.
