Gagik Avetisyan
Middle Devops & Cloud Engineer

SUMMARY

A proficient software engineer with a strong background in DevOps and cloud engineering, skilled in building scalable, secure, and resilient infrastructure. Over three years of experience in high-level solution architecture and CI/CD pipeline automation across multiple cloud platforms (AWS, Azure, GCP). Holds an AWS Certified Solutions Architect certification and demonstrates expertise with a wide range of technologies including Kubernetes, Terraform, Ansible, Jenkins, and Docker. Utilizes DevSecOps practices integrating security into automated pipelines and excels in monitoring and observability with tools like Prometheus and Grafana. The engineer's background in applied statistics and data science underpins their methodical and efficient approach to problem-solving and system architecture. This candidate stands out with hands-on experience in automating workflows and offers a proven track record of improving software delivery and system reliability in fast-paced environments.

TECHNICAL SKILLS

Main Technical Skills	AWS (2 yr.), Azure (2 yr.), Terraform (2 yr.), Ansible (2 yr.), Jenkins (2 yr.)
Programming Languages	JavaScript, Python
.NET Platform	Azure (2 yr.)
Python Frameworks	Django REST framework
Data Analysis and Visualization Technologies	Data Scraping, Data visualization
Databases & Management Systems / ORM	Microsoft SQL Server, MySQL, PostgreSQL
UI Frameworks, Libraries, and Browsers	HTML
Cloud Platforms, Services & Computing	AWS (2 yr.), Azure (2 yr.)
Deployment, CI/CD & Administration	Ansible (2 yr.), DevOps practices, Jenkins (2 yr.)
Web/App Servers, Middleware	Apache HTTP Server, Nginx
Methodologies, Paradigms and Patterns	DRY, FDD

SDK / API and Integrations	RESTful API
QA, Test Automation, Security	Selenium
Virtualization, Containers and Orchestration	Terraform (2 yr.)
Other Technical Skills	DevSecOps, Marathon
