

# Elnur Mammadov

## DevOps Engineer

DevOps, Blockchain and Cryptography, Site Reliability Engineer (SRE)

### Profile

Accomplished DevOps Engineer with a strong foundation in both the energy and technology sectors, bringing over a decade of engineering experience. Exceptional proficiency in Amazon AWS Services, containerization, and orchestration with certifications such as AWS Solution Architect, Certified Kubernetes Administrator, and HashiCorp Certified: Terraform Associate. Demonstrated capability in creating robust DevOps solutions, notably with Terraform, and managing CI/CD pipelines using Jenkins and Bitbucket. Proven track record with a MSc in Advanced Mechanical Engineering and significant achievements in creating testing environments, implementing SSO solutions, and leading complex projects in the DeFi space.
