Ilia
Senior blockchain developer

SUMMARY

I am a seasoned blockchain developer with proven experience in building, optimizing, and scaling projects across multiple layers and ecosystems. Beyond development, I also bring strategic connections and marketing expertise to help projects succeed from launch to adoption.

TECHNICAL SKILLS

Main Technical Skills	Blockchain
Industry Domain Experience	Blockchain
Blockchain and Decentralized Software	BNB, Ether, LayerZero, Smart Contract, Solana, TON
Methodologies, Paradigms and Patterns	DAG (Directed Acyclic Graph)
Other Technical Skills	Process Mining

I am a seasoned blockchain developer with proven experience in building, optimizing, and scaling projects across multiple layers and ecosystems.

Beyond development, I also bring strategic connections and marketing expertise to help projects succeed from launch to adoption.

Core Expertise:

Layer 1 Forks: Development and ownership of forks from leading PoW chains such as Bitcoin, Ethereum, Kaspa, and many others algos.

Layer 2 Solutions: Smart contract deployment and management across Ethereum, BSC, Solana, TON, and other major ecosystems.

Custom Exchange Development: Full-scale creation of centralized (CEX), decentralized (DEX), and hybrid exchanges tailored to project needs.

Additional Strengths:

Marketing & Growth: Strong presence in the crypto space with direct access to key influencers and major communities.

Strategic Partnerships: Established network of exchange managers, industry leaders, and top players to accelerate project listings and exposure.

Whether you need technical execution (forks, contracts, exchanges) or growth strategies (marketing, listings, partnerships), I provide end-to-end support to bring your blockchain

vision to life.I am a seasoned blockchain developer with proven experience in building, optimizing, and scaling projects across multiple layers and ecosystems.
