

Anton T.

Senior Dynamics 365 Engineer

SUMMARY

- Extensive experience developing, customizing, and integrating CRM systems across various industries using MS Dynamics 365, Power Apps, and Azure. - Proficient in a wide range of technologies, including .NET, C#, JavaScript, SQL, Entity Framework, Azure Functions, Azure Logic Apps, Angular, React, and various CRM and cloud platforms. - Skilled in deploying and managing Azure infrastructure, including developing Azure Functions and integrating them into cloud-based solutions. - Pending March 2025 Certifications: Power Platform Developer Associate

TECHNICAL SKILLS

Main Technical Skills	MS Dynamics 365, Microsoft Power Platform, C#, .NET
Programming Languages	C#, JavaScript
JavaScript Frameworks	Angular, AngularJS, jQuery, React
.NET Platform	ASP.NET Core Framework, Entity Framework, MS Dynamics 365, .NET, .NET Core
Databases & Management Systems / ORM	Microsoft SQL Server, SQL Server Management Studio
UI Frameworks, Libraries, and Browsers	CSS, HTML, jQuery
Azure Cloud Services	AAD, Azure DevOps, Azure DevOps Server (ex TFS Team Foundation Server), Azure Storage
Web/App Servers, Middleware	Azure DevOps Server (ex TFS Team Foundation Server)
Version Control	Git
Platforms	Microsoft Power Platform
SDK / API and Integrations	OData, Web API, Winforms
QA, Test Automation, Security	Postman
Third Party Tools / IDEs / SDK / Services	ReSharper, SQL Server Management Studio, Visual Studio, Web Services
Methodologies, Paradigms and Patterns	REST, Scrum

Other Technical Skills

App Service, Field services, Web App

Dynamics 365 Engineer, Alcumus

November 2023 - Now 2024

Description: The project focused on developing an integrated approach to managing health, safety, and ESG across industries, locations, and contractor and supplier networks.

This included developing CRM systems and additional components such as APIs, client interfaces, and data migration services.

Responsibilities:

- Implemented advanced business logic and created new plugins, API endpoints, and DB structures.
- Deployed and managed Azure infrastructure. Developed new Azure Functions and integrated them into existing cloud solutions.
- Updated, managed, and redesigned desktop and mobile web GUI.
- Identified and resolved issues. Tracked down bugs. Modified existing software to correct coding errors, upgrade interface, and improve overall performance.
- Designed cloud infrastructure, DBs, new features, documentation, and deployment plans.
- Fixed existing cloud flows and created new ones.

Tools & Technologies: NET/C#, Angular, MS Dynamics 365, Power Platform, Power apps, .NET, JavaScript, jQuery, Cloud Flows, XrmToolBox, Azure Functions, Azure Logic App.

Backend Engineer, Lulalend

March 2023 - November 2023

Description: Developing a complex financial system that facilitates the rapid approval and disbursement of business funding.

Responsibilities:

- New feature development - understanding the business logic and designing efficient solutions.
- Conducting thorough testing
- Writing clean and maintainable code and integrating the new features into the existing codebase
- Code reviews - providing constructive feedback, suggesting improvements
- Bug fixing, refactoring
- Project support

Tools and Technologies: .NET, C#, ASP.NET, EF, SQL.

Dynamics 365 Engineer, MySurgPro Portal

December 2021 - March 2023

Description: Create a system for optimizing surgical clinic processes. Automation of checks and support of client applications.

Responsibilities:

- Writing clean, efficient, and well-documented code
- Creating detailed design documents
- Conducting thorough testing
- Identifying, diagnosing, and resolving issues
- Bug fixing, refactoring, code reviews

Tools & Technologies: MS Dynamics 365, Power Platform, Power apps, .NET, Node.js, JavaScript, TypeScript, SISS packages (Data migration solutions), Field Services, Dynamics 365 Portals, Azure Functions, Azure blob, LogicApps, WCF, Angular, React, HTML, jQuery.

Dynamics 365 Engineer, Banking CRM

August 2020 - December 2021

Description: Develop a CRM system based on the Dynamics 365 platform for a Canadian bank.

Responsibilities:

- New feature development and designing efficient solutions
- Bug fixing and refactoring
- Task assessment and code reviews
- Implement Azure base integration between Dynamics 365 system and external systems via REST API.
- Dynamics 365 customizations: ribbons, workflows, business rules, site maps, entities, forms, attributes, security
- Conducting thorough testing

Tools & Technologies: C #, .NET, Net4.5/C#, Visual Studio, Dynamics 365, Power Platform, Web API, .NET Core, Azure, TFS, Git, AngularJS, jQuery.

Dynamics 365 Engineer, Retail CRM system

September 2019 - August 2020

Description: Developing a CRM system based on the Dynamics 365 platform.

Responsibilities:

- New feature development - understanding the business logic, designing efficient solutions
- Conducting thorough testing
- Writing clean and maintainable code and integrating the new features into the existing codebase
- Code reviews - providing constructive feedback, suggesting improvements

Tools & Technologies: C#, .Net, Javascript, Microsoft Dynamics 365, Power Platform, Power Apps, Entity Framework, IIS, HTML5, CSS3, SVN, MS SQL.
