ISEOLUWA ADEIYE OSO
Middle Software Quality Assurance Engineer

SUMMARY

Software Quality Assurance Engineer with expertise in manual and automated testing, including Selenium, Postman, and Cypress. Proficient in Agile Scrum methodology, technical communication, and various testing forms such as functional, regression, and exploratory testing. Holds an Engineering degree and multiple certifications, including SCRUM MASTER and AGILE JIRA. Well-versed in SDLC, software management, and engineering practices, with hands-on experience in diverse projects and freelance testing communities. Recognized for analytical thinking, problem-solving abilities, and a strong commitment to ensuring software quality.

TECHNICAL SKILLS

Main Technical Skills	Usability tests, SDLC, Scrum, Postman, QA Automation
Databases & Management Systems / ORM	RDBMS
Azure Cloud Services	Azure log analytics
Google Cloud Platform	Cloud Functions
Collaboration, Task & Issue Tracking	Atlassian Confluence
QA, Test Automation, Security	JUnit, Postman, QA Automation, Selenium, Usability tests
Methodologies, Paradigms and Patterns	Scrum, SDLC
Other Technical Skills	Problem-solving, STLC

WORK EXPERIENCE

Software Quality Assurance Engineer, [Green Acumen Insights]

Duration: 03/2024 - 04/2025

Summary: Conducting end-to-end (E2E) exploratory testing and functional testing to validate software performance and usability, while documenting identified bugs and suggesting usability enhancements.

Responsibilities: Writing comprehensive test plans, performance of end-to-end exploratory testing, documenting bugs and usability suggestions, conducting functional testing.

Technologies: Manual testing, End-to-End testing

Manual Quality Assurance Engineer, [EstateGO]

Duration: 12/2024 - 04/2025

Summary: Collaborating with QA and development teams to identify and document software defects, performing regression testing and creating detailed bug reports.

Responsibilities: Collaborating with QA and dev teams, documenting defects, creating bug reports, performing regression testing.

Technologies: Manual testing, Regression testing

Software Quality Assurance Tester (Test Lead), [DORMOT APP]

Duration: 11/2024 - 01/2025

Summary: Leading the QA team, developing test plans, cases, and report sheets, executing test cases and managing the defect life cycle.

Responsibilities: Developing QA deliverables, executing test cases, tracking and reporting defects.

Technologies: Test planning, Test execution, Defect tracking

Software Tester, Software Mentorship Program

Duration: 06/2024 - 01/2025

Summary: Executing tests and creating test scripts to validate new features, automating API testing, and handling regressing testing with Cypress tool for product stability.

Responsibilities: Planning and executing tests, creating test scripts, automating API testing processes, highlighting workload risks, running regression tests, leveraging test management tools.

Technologies: Automated API testing, Regression testing, TestRail, Jira, MS Excel, Cypress

Software Manual Tester, [UTest]

Duration: 02/2023 - Till Present

Summary: Participating in various testing activities, executing user stories, performing unit, integration, and regression testing across devices and services.

Responsibilities: Execution of User stories, Bug fix Confirmations, Unit, Integration, and Regression Testing, Manual Testing.

Technologies: Manual testing

Software Manual Tester, [Testerwork]

Duration: 05/2022 - Till Present

Summary: Conducting exploratory testing, executing test cases, and tracking defects in a freelance capacity for a global app testing firm.

Responsibilities: Exploratory Testing and Usability suggestions, executing the test cases, documenting the results, reporting the defects, tracking the status.

Technologies: Exploratory testing, Performance testing

Software Manual Tester, [Digivante]

Duration: 05/2022 - Till Present

Summary: Performing functional and regression testing, exploratory testing of various types of applications, and maintaining extensive documentation for defect tracking.

Responsibilities: Executing the test cases, documenting the results, reporting the defects, tracking the status, Exploratory Testing of diverse applications, Functional and Regression Testing.

Technologies: Functional testing, Regression testing, Exploratory testing

EDUCATION

- **Bachelor's of Engineering Degree in Mining Engineering**
- B.Eng at the Federal University of Technology, Akure
- 2024

CERTIFICATION

- **SCRUM MASTER AND SOFTWARE TESTING**
- Hagitial Consulting
- 2025
- **AGILE WITH ATLASSIAN JIRA**
- Atlassian University - Coursera
- 2022
- **SOFTWARE DEVELOPMENT LIFESTYLE SPECIALIZATION**
- University of Minnesota - Coursera
- 2023
- **ENGINEERING PRACTICES FOR BUILDING QUALITY SOFTWARE**
- University of Minnesota - Coursera
- 2023
