Mohammad Foisal
Beginner Backend Developer

SUMMARY

A backend developer with a strong focus on Python and JavaScript, proficient in Django, and dedicated to building scalable web applications. The developer brings a hands-on approach and a background in computer science education with coursework completed at prestigious institutes such as CS50x at Harvard University. Commended for a robust engineering foundation, particularly in RESTful APIs, SQL databases, and automation, they are an asset in modern software development environments. Their technical prowess is complemented by an education in business studies, augmenting their technical skillset with strategic acumen. With a dedication to clean code, continuous learning, and effective collaboration, this developer is poised to contribute significantly to dynamic teams in the tech industry.

TECHNICAL SKILLS

Main Technical Skills	Python, JavaScript, SQL
Programming Languages	JavaScript, Python
Python Frameworks	Django, Django REST framework
Databases & Management Systems / ORM	SQL

EDUCATION

- **Master of Business Studies**
- Management
- **Bachelor of Management**
- Management

CERTIFICATION

- **Full Stack Web Development with Python, Django & React**
- Institute: ostad.app
- 2024 - ongoing
- **Web Programming with Python and JavaScript**
- Institute: CS50x, Harvard University
- 2021
- **Introduction to Computer Science**
- Institute: CS50x, Harvard University
- 2020
