

Erick Hermawan

Senior Software Developer

SUMMARY

I'm a Senior Software Developer with 13+ years of experience building scalable web applications for international remote teams. My primary stack includes React, Node.js, Python, PostgreSQL, and cloud platforms such as Google Cloud and AWS. Recently, I've been developing AI-powered web applications and automation workflows while collaborating with distributed teams across the US, Singapore, and Europe. I enjoy creating clean, maintainable solutions, continuously learning new technologies, and contributing to products that deliver real business value.

TECHNICAL SKILLS

Main Technical Skills	RESTful API, Backend, React
JavaScript Frameworks	React
SDK / API and Integrations	RESTful API
