

Andrii Rasskazov

Architect/Lead QA Lead / Senior QA Engineer

SUMMARY

- 12+ years leading QA in Automotive (HMI/Infotainment), Enterprise Desktop, and Web domains.
- Expert in test strategy, manual and API testing, HMI, regression, and exploratory testing.
- Proven leadership managing distributed teams, mentoring, sprint planning, and QA process improvements.
- Skilled with Jira, Confluence, Postman, SQL, Jenkins, Git, AWS, MQTT, and JMeter.
- Certified ISTQB CTFL with strong stakeholder collaboration and risk management expertise.

TECHNICAL SKILLS

Main Technical Skills	Manual Testing (12 yr.), Functional Testing (12 yr.), regression testing (12 yr.), exploratory testing (12 yr.)
Data Analysis and Visualization Technologies	KPI Dashboards & Scorecards (5 yr.)
Databases & Management Systems / ORM	SQL (12 yr.)
Cloud Platforms, Services & Computing	AWS (12 yr.)
Azure Cloud Services	Azure Cloud Functions (12 yr.)
Collaboration, Task & Issue Tracking	Atlassian Confluence (12 yr.), Jira (12 yr.)
Platforms	ERP, RPA (12 yr.)
QA, Test Automation, Security	exploratory testing (12 yr.), Fiddler (12 yr.), Functional Testing (12 yr.), JMeter (12 yr.), Manual Testing (12 yr.), Postman (12 yr.), regression testing (12 yr.)
Version Control	Git (12 yr.)
Deployment, CI/CD & Administration	Jenkins (12 yr.)
Soft Skills	Mentor Aptitude
Message/Queue/Task Brokers	MQTT (3 yr.)
Other Technical Skills	

WORK EXPERIENCE

Senior QA Engineer - Luxoft (Halliburton Project)

Duration: Sep 2022 – Present

Summary: A complex enterprise desktop application project aimed at ensuring high software stability and performance for Halliburton, a leading energy services company.

Responsibilities:

- Executed and coordinated QA activities to maintain software quality and stability.
- Mentored and coached QA engineers to enhance team skills and testing standards.
- Collaborated with Product Owners, Developers, Automation, and Design teams to refine functional requirements and align test coverage.
- Streamlined QA processes and managed risks proactively to avoid blockers and maintain release schedules.

Technologies: Jira, Confluence, Postman, Fiddler, SQL, Jenkins, Git, AWS

Senior QA Engineer / QA Lead - Luxoft (Ford SYNC4 Infotainment System)

Duration: Apr 2019 – Sep 2022

Summary: Managed QA delivery for the Automotive AppLink domain of the Ford SYNC4 Infotainment system, a next-generation in-car infotainment platform integrating HMI and connectivity features.

Responsibilities:

- Designed and executed end-to-end test strategies including HMI, functional, and integration testing on physical hardware and emulators.
- Coordinated cross-functional and geographically distributed QA teams, optimizing resource allocation and sprint execution.
- Mentored QA engineers and developed onboarding documentation to accelerate new team member ramp-up.
- Collaborated with technical stakeholders and Product Owners to define acceptance criteria and ensure release readiness.

Technologies: Jira, Confluence, Postman, Fiddler, SQL, Jenkins, Git, MQTT

QA Engineer - SDL (Web Projects)

Duration: Sep 2013 – Mar 2019

Summary: Delivered QA services for various web projects at SDL, a global leader in content management and language translation technology.

Responsibilities:

- Translated complex business goals and stakeholder expectations into QA functional requirements and comprehensive test cases.
- Defined end-to-end QA strategies, test plans, and resource allocation models.

- Mentored junior and mid-level QA engineers to improve team efficiency and technical skills.
- Prepared and conducted product demos for internal stakeholders and clients to validate delivery milestones.

Technologies: Jira, Confluence, Postman, SQL, JMeter

EDUCATION

- **Master of Computer Science**
Kharkiv National Aerospace University

CERTIFICATION

- **ISTQB Certified Tester Foundation Level (CTFL)**
Certified Expert
