

Serhii Z.

Senior BI/Data Engineer

SUMMARY

- BI development background with expertise in Power BI Pro, complex DAX, Power Query, Azure Data Factory, Azure DevOps and CI/CD automation.
- Skilled in SQL, T-SQL, Azure SQL, and Microsoft SQL Server, including query optimization, scalable data modeling, and database engineering.
- Experienced in ETL and data integration, ADLS, Azure Synapse Analytics and Databricks, including data pipelines and notebooks.
- Experience with Parquet optimization, including partitioning and compression, with the ability to quickly deepen expertise.
- Background in data warehousing, stored procedures, triggers, SSIS, Apache Airflow and Microsoft Fabric.

TECHNICAL SKILLS

Main Technical Skills	Power BI, SQL, Databricks, Azure Data Factory
Programming Languages	Python, VBA
Java Frameworks	ADF
Java Libraries and Tools	Jasperreports
Salesforce Ecosystem	Salesforce
.NET Platform	VBA
Data Analysis and Visualization Technologies	ADLS, Apache Airflow, Azure Data Factory, Azure Synapse Analytics, Data Analysis Expressions (DAX), Databricks, Data Modeling, ETL, ETL Pipelines, OLAP, Power BI, Sisense, Tableau
Databases & Management Systems / ORM	Data Warehouse, Data Warehousing, DWH, Microsoft SQL Server, PostgreSQL, Snowflake, SQL, SSAS, SSIS, T-SQL
Cloud Platforms, Services & Computing	Azure, GCP
Amazon Web Services	AWS WorkSpaces
Azure Cloud Services	Azure Data Factory, Azure DevOps, Azure Synapse Analytics, Databricks
Google Cloud Platform	Google Data Studio
Deployment, CI/CD & Administration	CI/CD
	Excel, Power Query

Third Party Tools / IDEs / SDK / Services	
Version Control	Git
QA, Test Automation, Security	IDS
File Systems, Storage	Parquet
Scripting and Command Line Interfaces	PowerShell
Platforms	Salesforce, SAP
Methodologies, Paradigms and Patterns	UML
Other Technical Skills	Data Analysis Expressions, Data Integration, Google Cloud Platforms, Jaspersoft, Looker, Microsoft Fabric, M query, PowerShell scripts, Salesforce Administration, Snowflake Data Warehouse

WORK EXPERIENCE

BI Engineer, N-iX (Power BI and Data Platform Development)

Duration: Feb. 2024 - Present

Summary: Development of interactive Power BI reports with complex DAX measures and dynamic row-level and object-level security, integrating data from Databricks and SAP sources. Architecting and managing CI/CD pipelines for automated Power BI deployment using Azure DevOps and Microsoft Fabric. Authoring ETL pipelines in Azure Data Factory and automating dataset refreshes with PowerShell.

Responsibilities:

- Build interactive Power BI reports with complex DAX and dynamic security.
- Architect and manage CI/CD pipelines for Power BI deployment with Git integration.
- Creation of ETL pipelines using Azure Data Factory (ADF) for seamless data integration.
- Automate dataset refreshes and govern Power BI workspaces within Microsoft Fabric.
- Data modeling and optimization to enhance performance and scalability.
- Writing complex database scripts, stored procedures, triggers, and functions.
- Optimization of queries to ensure efficient data retrieval and performance improvement.
- Automation of dataset refreshes using PowerShell scripts.
- Management of Power BI workspaces and collaboration with cross-functional teams for data accuracy.
- Git integration setup for Power BI.

Technologies: Power BI, DAX, Azure Data Factory, Azure DevOps, Microsoft Fabric, Databricks, SAP ACDOCA/ACDOCP, PowerShell.

BI Engineer, Silverstein Properties (Real-Estate BI Reporting and Automation)

Duration: Feb. 2023 - Feb. 2024

Summary: Delivered Power BI reports and dashboards aligned with real-estate KPIs. Built CI/CD pipelines for automated report deployment and optimized SQL queries and data models to improve reporting performance.

Responsibilities:

- Develop Power BI reports and dashboards for real-estate KPIs.
- Build CI/CD pipelines for automated report deployment.
- Optimize SQL queries and refine data models for performance.
- Creation database scripts.
- Enhancement database performance.
- Support issues/problem solving.

Technologies: Power BI, SQL, Azure.

BI Engineer, SPD-Ukraine (Analytics Dashboard and Pipeline Orchestration)

Duration: Feb. 2022 - Feb. 2023

Summary: Built analytics dashboards in Looker on a Snowflake data warehouse. Authored database scripts and optimized queries. Designed and deployed DAGs in Apache Airflow for automated pipeline orchestration.

Responsibilities:

- Develop analytics dashboards in Looker using Snowflake data warehouse.
- Author database scripts and optimize queries.
- Design and deploy DAGs in Apache Airflow for pipeline automation.

Technologies: Looker, Snowflake, Apache Airflow.

BI Engineer, Yael Acceptic (Power BI Reporting and ETL Development)

Duration: Mar. 2021 - Feb. 2022

Summary: Developed Power BI reports and CI/CD deployment pipelines. Built ETL pipelines using Azure Data Factory and performed data modeling and query optimization in MS SQL Server.

Responsibilities:

- Develop Power BI reports and CI/CD deployment pipelines.
- Write stored procedures, triggers, and functions in MS SQL.
- Build ETL pipelines using Azure Data Factory.
- Perform data modeling and query optimization.
- Creation of database scripts, procedures, triggers, functions.

Technologies: Power BI, Azure Data Factory, MS SQL Server.

Data Engineer, Extenda Retail (Data Warehouse Infrastructure and ETL Pipelines)

Duration: Mar. 2020 - Mar. 2021

Summary: Designed data warehouse infrastructure and ETL pipelines using Apache Airflow, SSIS, and Azure Data Factory across multi-cloud environments including Azure, Snowflake, and Google Cloud Platform. Developed reporting stored procedures across multiple database platforms.

Responsibilities:

- Design DWH infrastructure and ETL pipelines using Airflow, SSIS, and ADF.
- Develop reporting stored procedures across MS SQL, Azure, Snowflake, and GCP.
- Creation business reports using Jaspersoft software.
- Creation database scripts.
- Enhancement database performance.

Technologies: MS SQL Server, Azure, Apache Airflow, SSIS, Snowflake, Google Cloud Platform.

BI Engineer, IDS Borjomi International (Data Warehouse and Reporting Development)

Duration: Sep. 2019 - Mar. 2020

Summary: Built data warehouse components and ETL pipelines using SSIS and Azure Data Factory. Developed reports in Power BI and Tableau, working with MS SQL Server, Azure, SSAS, and PostgreSQL databases.

Responsibilities:

- Build DWH components including triggers, procedures, and indexes.
- Develop ETL pipelines with SSIS and ADF.
- Create reports in Power BI and Tableau.
- Work across MS SQL, Azure, SSAS, and PostgreSQL.
- OLAP measure analysis and improvement of calculations.
- Business processes analysis.
- Weekly/monthly sales reports.

Technologies: Power BI, Tableau, MS SQL Server, SSIS, SSAS, Azure, PostgreSQL.

Salesforce Admin/BI Engineer, British American Tobacco (BI Solutions and Salesforce Administration)

Duration: Sep. 2018 - Sep. 2019

Summary: Delivered BI solutions integrating CRM, e-commerce, and third-party data sources using Power BI and Google Data Studio. Managed full Salesforce administration including user and security management, workflow automation, data imports, and system documentation.

Responsibilities:

- Deliver BI solutions from CRM, e-commerce, and third-party data sources.
- Manage Salesforce administration: user/security management, workflow automation, data imports, and documentation.

Technologies: Power BI, Salesforce, Azure Data Factory, Google Data Studio.

Data Analyst, Performance Control (Data Analysis and Reporting)

Duration: Feb. 2018 - Sep. 2018

Summary: Performed data analysis using Excel and VBA to produce operational reports supporting multiple business projects.

Responsibilities:

- Perform data analysis using Excel and VBA.
- Produce operational reports for various business projects.

Technologies: Excel, VBA.

EDUCATION

- **B.S. Software Engineering, Cherkasy State Technological University**
2016 - 2018
- **Junior Specialist, Cherkasy Polytechnical College**
2012 - 2016
