PROJECTS

Full Stack Developer, CommunicationsMatch

<https://www.communicationsmatch.com/about>

Description: CommunicationsMatch's powerful agency search, consulting, and engagement tools and

resources help companies find recommended communicators that match specific needs, save time, and improve agency search outcomes.

Technologies: ReactJS frontend (user) part, NodeJs microservices, PHP Laravel core and CMS adminpanel, APIs for the websites/mobile app

Back-end developer, lcl

Description: Development from scratch. This is a stock exchange on which employers can look and pick up specialists. The site is adaptive. On the site there is a search filter for companies, in particular search by zip code (you can specify the radius in which you can search for companies). There are two types of users on the site: lister and a searcher.

Technologies: Laravel 5.0, MySQL 5.6, JS, HMVC, Gulp, Git, SSH, Mailgun API, Google Maps API, Google Analytics, PHP

Back-end Developer, Beko Bonus CRM

Description: Adminpanel to manage orders for transportation of cargoes, formation of consolidated

containers from several orders

- the freight forwarder is registered in the system
 - search for a container within the desired route
 - or creates a new order (chooses the route or container)
 - adds the order into the desired container
 - gets the order statuses during the process of the formation/shipping of the container
- PHP framework

Laravel development.

Technologies: PHP, Laravel, Mysql

Team Lead, iMover

Description: This CRM application is made for in-home moving estimates. It allows the user to make videos up to five minutes long and share them with the movers to get a quote. The application is safe and recently we've launched a new update. That fixes any bugs that were in the system.

Technologies: php,laravel,react js,node js,mysql,twili

Back-end Developer, Lastbid.com

Description: LastBid is a convenient, one-stop platform, listing these unsold lots in one place, giving each item additional exposure and a second chance of finding a new home. More information here.

Technologies: php,laravel,mysql

EDUCATION

Master's Degree in System Programming, Khmelnitsky National University

2006 – 2011
