

Hiring software engineer as easy as calling a taxi.

Marcio A.

Data Engineer

SUMMARY

- 20+ years of experience in IT
- Experience in Support Analyst, Systems Analysis, Software Development, Data Engineer, Database Engineer, Systems Integration, Integration Developer, Data Analysis, Data Structures, Data Integration, Database Migration, Database Modeler, Database Analyst/Developer, Database Design, Database Management, Data Warehouse, Data Discovery, ELT/ETL, Extract, Transform, Load, Data Pipelines, Data Replication, Business Intelligence, Data Modeling (Dimension and Relational), Performance Tuning (SQL, PL/SQL Applications), experience in working with large databases and datasets, testing, validation, implementation, and troubleshooting skills, performance and resource optimization improvements, maintaining development, test and production environments, experience with process automation (monitoring, alerting, auto-corrective) and distributed systems, strong knowledge in PL/SQL, SQL, Oracle Database and
- Knowledge in Agile methodology (Scrum, Kanban).
- Upper-Intermediate English
- Available ASAP
- No vacation plans

SKILLS

Main Technical Skills	Kafka (1 yr.)
Programming Languages	Java, JavaScript, PL, Python, Scala, VBScript
UI Frameworks, Libraries, and Browsers	HTML, XML
Java Libraries and Tools	JSON
Data Analysis and Visualization Technologies	Apache Airflow, Apache Hive, Business Intelligence (BI) Tools, Data Analysis, ELT, ETL
Databases & Management Systems / ORM	Apache Hadoop, Apache Hive, Database Administration, Database Analysis, Database Design, Database Modeler, Database Modeling, Data Warehouse, Google BigQuery, Microsoft SQL Server, MongoDB, MySQL, Oracle Database, PostgreSQL, Snowflake, SQL, SQL Tuning

Cloud Platforms, Services & Computing	AWS, Azure, GCP
Amazon Web Services	AWS big data services
Azure Cloud Services	Azure
Google Cloud Platform	Google BigQuery
Virtualization, Containers and Orchestration	Docker
SDK / API and Integrations	Electronic Data Interchange (EDI)
Third Party Tools / IDEs / SDK / Services	Excel, Microsoft Word, Office 365, PowerPoint
Message/Queue/Task Brokers	Kafka (1 yr.)
Deployment, CI/CD & Administration	Kubernetes
Operating Systems	Linux, macOS, Unix, Windows
UI/UX/Wireframing	Microsoft Visio
Methodologies, Paradigms and Patterns	Scrum
Other Technical Skills	Business Requirements, Cloud Computing, CSV, Data Architect, Data Integration, Data Science, Data Transformation, System Analysis, Visual Basic

EXPERIENCE

Data Engineer, Systems Integration Consulting, ETL/ELT, Data Engineering, NEORIS

May 2020 – May 2021 (1 year project)

Responsibilities:

- I worked as an IT Consultant assigned by NEORIS for British American Tobacco Holding.
- Develop and Supports the metadata ingestion process to help the company create a Modern Datawarehouse/Data
- Lake from many sources (Databases, Datasets, Files, APIs) using Wherescape RED Tool, ensuring that it runs efficiently, reliably, and scalably, through the initiation and monitoring of ingestion processes.
- Collaborates closely with internal and external stakeholders in the ingestion process. Contributes to the design, development, testing, integration, support, and documentation of user-facing applications and back-end systems.

Technologies: SQL, SnowFlake Database, Wherescape RED, Microsoft Azure (Azure Blob Storage, Azure DevOps, Azure Datafactory)

Data Engineer, ETL Developer, Data Integration, Database Developer, Software Engineer, System Analyst , IT Consultant

September 1994 – Present (more than 25 years)

Responsibilities:

- Requirements Analysis, System Analysis, Software Developer
- Database Developer, Database Design, Database Modeler, Database Object Management
- Database Analyst, Data Analyst, ETL Developer, Oracle Developer, Software Developer, Data Integration
- Data Replication, Performance Tuning and Query Optimization, Process Automation, experience working remotely when needed.

Data Engineer, ETL, Database Developer, Systems / Data Analyst, Software Engineer DBC Company

March 2015 – April 2019 (4 years 3 months)

Responsibilities:

- I worked as an IT Consultant for clients of DBC Company Below are some clients where I worked assigned by DBC Company - www.dbccompany.com.br
- Systems Analyst, Oracle Developer, Database Developer

Dana Holding Corporation Brazil

March 2015 – October 2015 (7 months)

Responsibilities:

- I worked alongside the client's business area and my main job tasks were Tasks Management, Improvement of Business Process, Process Automation, Requirements Analysis, System Analysis, Software Developer,
- Database Design, Database Modeling, Database Object Management, Maintaining Development, Test and Production Environments.

Technologies: Oracle Database (10g, 11g), Oracle Forms 10g, Oracle Reports 10g, Oracle PL/SQL, SQL, Windows, Microsoft Office.

ETL, Database Developer, Systems Analyst, Data Analyst, Software Engineer Grupo DIMED

November 2015 – April 2019 (3 years 6 months)

Description: The result of this project made it possible to keep up-to-date near real-time critical data such as promotions, prizes, price of items, sales, items of sales, taxation, customers information and others, avoiding integrity errors and creating predictive actions alerts to solve possible errors. In another special project, I worked to improve the validation process of the PBM (Program Benefits Management) based on the sales information and

optimization of the data warehouse integration process.

Responsibilities:

- I worked as System Analyst, Data Analyst, ETL Developer, Oracle Developer, Software Developer, Data Integration, Data Replication, Performance Tuning and Query Optimization, experience working remotely when needed.
- My main job tasks are Analysis, Development, Process Optimization, Requirements Analysis, Process Automation, Improvement of Business Process, System Analysis, Database Design, Database Modeling, Database Object Management, Database Analyst, ETL, Data Integration, Data Replication Process
- Monitoring more than 400 Oracle instances(pharmacy stores), Maintaining Development, Test and Production Environments.
- I was responsible for analyzing, designing and developing a new Integrated System that has a Data Pipeline from 4 main Oracle Instances and more than 400 others Oracle Instances outside the company, located in many cities in 4 provinces.

Technologies: Oracle Database (10g, 11g, 12c) Oracle Forms 10g, Oracle Reports 10g, Oracle PL/SQL, SQL, Oracle APEX, Python, Linux, Windows, Microsoft Office.

São João Pharmaceutical Group

2014

Analysis and Development - Data Integration Process Monitoring for more than 400 Database Instances (pharmacy stores), maintaining development, test and production environments.

Court of Justice of Rio Grande do Sul – Brazil

2013

Analysis and Development - Data Replication Process Monitoring about 100 Oracle instances (database of County Courthouse), maintaining development, test, and production environments.

TNT - Brazil, Electronic Document Management System

2010

Analysis and Development, maintaining development, test and production environments, implementing a Tracking Control near real-time based in EDI files for Apple products.

Technologies: GCP, AWS, Azure, Python, Oracle Database (9i, 10g, 11g), Oracle Forms (6i, 10g),

Oracle Reports (6i, 10g), Oracle PL/SQL, SQL, ODI 10g (Oracle Data Integrator), MySQL, PostgreSQL, Pentaho Data Integration, Metabase, Java, Microsoft Visual Basic; Microsoft SQL Server, T-SQL, ZIM, Microsoft Office, Windows, Unix, Linux, SVN, CVS, GitHub.

EDUCATION

Artificial Intelligence, Machine Learning and Data Science - Lato Senu Postgraduate

Lato Senu - Postgraduate Degree - Online, Information Technology

Universidade - Centro de Inovação VincIT – UNICIV – On-line

<https://www.uniciv.com.br/cursos/intelig%C3%A2ncia-artificial%2C-machine-learning-e-data-science>

Database Technology

Associate Degree – Online, Information Technology

Universidade Cruzeiro do Sul – On-line - www.cruzeirodosulvirtual.com.br/graduacao/banco-de-dados

January 2018 – June 2021

Bootcamp Data Lakehouse - Snowflake (8 hours)

triggo.ai – www.learning.trigoo.ai/

On-line, October 2021

Bootcamp Cloud Data Engineering (148 hours)

IGTI - www.igti.com.br

On-line, August and September 2021

Data Engineering – Apache Kafka

Apache Kafka, Data Architecture

Training at One Way Solution - www.linkedin.com/company/one-way-solution

On-line, August 2021

Kubernetes Bootcamp 2.0

Formação KubeDev – kubedev.io

On-line, July 2021

Data Engineer on Databricks

Databricks Academy - academy.databricks.com/data-engineer

On-line, June 2021

Data Engineering with Apache Spark

Spark, Kafka, Databricks, Cloud Stacks, Architecture, Streaming and Batch Processing

Training at One Way Solution - www.linkedin.com/company/one-way-solution

On-line, May 2021

Data Engineering on Databricks

Architecture, Streaming and Batch Processing, Databricks, Kafka, Spark, Cloud Stacks

Training at One Way Solution - www.linkedin.com/company/one-way-solution

On-line, November 2020

Data Engineer (304 hours)

Professional Extension Program at Data Science Academy - www.datascienceacademy.com.br

On-line, October 2020

Data Engineering on Apache Kafka Confluent

Kubernetes, Kafka, Apache Druid, Spark, Cloud Stacks

Training at One Way Solution - www.linkedin.com/company/one-way-solution

On-line, September 2020

Bootcamp DevOps Professional (148 hours)

IGTI - www.igti.com.br

On-line, September and October 2020

Big Data Support and Infrastructure (176 hours)

Specialization Program at Data Science Academy - www.datascienceacademy.com.br
On-line, July 2020

Google Cloud Platform – Architecting with Google Compute Engine

Specialization Program at Coursera - www.coursera.org
On-line, June 2020

Google Cloud Platform – Cloud Engineering with Google Cloud

Specialization Program at Coursera - www.coursera.org
On-line, June 2020

Google Cloud Platform - Big Data, Data Science and Machine Learning

Specialization Program at Data Science Academy - www.datascienceacademy.com.br
On-line, April 2019

AWS Solutions Architect

Specialization Program at Data Science Academy - www.datascienceacademy.com.br
On-line, December 2018

Coursera - www.coursera.org

Data Engineering on Google Cloud Platform Specialization - Extension Program – Online

- Google Cloud Platform Big Data and Machine Learning Fundamentals
- Unstructure Data with Cloud Dataproc
- Serverless Data Analysis with BigQuery and Cloud Dataflow
- Serverless Machine Learning with Tensorflow

Associate Cloud Engineer - Extension Program – Online

- Essential Google Cloud Infrastructure: Foundation
- Google Cloud Platform Fundamentals for AWS Professionals
- Google Cloud Platform Fundamentals: Core Infrastructure
- Essential Google Cloud Infrastructure: Core Services
- Elastic Google Cloud Infrastructure: Scaling and Automation
- Reliable Cloud Infrastructure: Design and Process
- Preparing for the Google Cloud Associate Cloud Engineer Exam

In Progress/Soon (On-Demand):

- Kubernetes Training <https://kubedev.io>
- Data Scientist

Specialization Program at Data Science Academy - www.datascienceacademy.com.br

- Data Architect

Specialization Program at Data Science Academy - www.datascienceacademy.com.br

- Machine Learning Engineer

Specialization Program at Data Science Academy - www.datascienceacademy.com.br

- Blockchain Engineer

Specialization Program at Data Science Academy - www.datascienceacademy.com.br

The whole programs will complement and improve my skills in many areas as:

- Data Warehouse - Design and Implementation
- Data Lake - Design, Project and Integration
- Data Engineering with Hadoop Ecosystem and Spark
- Big Data Real-Time Analytics with Python and Spark

- Big Data, Data Science and Machine Learning - Google Cloud Platform
- Machine Learning and Artificial Intelligence in Distributed Environments
- Security and High Availability of Data
- Analytics, Visualization, Reports and Decision-Making
- Distributed Databases
- SQL and NoSQL Databases
- Database Management and Data Governance
- Big Data Analytics
- Data Mining and Predictive Analysis
- Programming in Python, Scala, Java, Javascript, Go, Solidity
- Blockchain Foundations and Development of Decentralized Applications
- Machine Learning with Scala and Spark
- Predictive Analysis with Machine Learning in Java
- IA Applications with Deep Learning in Java
- Project Management of Big Data
- DevOps, DataOps, Docker, Kubernetes
- Google Cloud Platform, Amazon Web Services, Azure
