Maksym L.
Senior Backend / ML developer

SUMMARY

A seasoned software engineer and backend developer with over a decade of experience in the IT industry, specializing in complex backend systems, machine learning, and team leadership. Strong foundation in computer science with an MSc and a PhD in Applied Informatics and Machine Learning from Uzhgorod National University. Proficient in a breadth of technologies including Java, iOS, Android, JavaScript, PHP, Node.js, and Python. Demonstrated ability to spearhead development projects and manage teams, adopting Scrum methodologies and streamlining SDLC processes. Significant expertise in creating robust solutions using Node.js, PostgreSQL, and various cloud services. A proven track record in delivering scalable, high-quality applications for diverse industries, including finance, healthcare, e-commerce, and construction.

TECHNICAL SKILLS

Main Technical Skills	Java (12 yr.), Microsoft Azure API (5 yr.), Scrum, Node.js (3 yr.), Python (3 yr.)
Programming Languages	C, Java (12 yr.), PHP, Python (3 yr.), TypeScript
.NET Platform	ADO.NET, ASP.NET MVC, ASP.NET Web API
UI Frameworks, Libraries, and Browsers	Ajax, Ant Design, jQuery
Android Libraries and Tools	Android APIs
AI & Machine Learning	AWS ML (Amazon Machine learning services)
JavaScript Frameworks	jQuery, NestJS, Node.js (3 yr.)
JavaScript Libraries and Tools	React Native
Databases & Management Systems / ORM	Microsoft SQL Server, MongoDB, MySQL, PostgreSQL
Cloud Platforms, Services & Computing	Heroku

Amazon Web Services	AWS Aurora, AWS EC2, AWS Lambda, AWS ML (Amazon Machine learning services), AWS S3, AWS SAM, AWS SNS, AWS SQS
Azure Cloud Services	Microsoft Azure API (5 yr.)
SDK / API and Integrations	Android APIs, ASP.NET Web API, Microsoft Azure API (5 yr.)
Version Control	Assembla, Git, SVN
Collaboration, Task & Issue Tracking	Atlassian Trello, Jira
Platforms	CMS
Methodologies, Paradigms and Patterns	Kanban, Scrum
QA, Test Automation, Security	NUnit
Other Technical Skills	GrapesJS, Pivotal tracker, RallyDev

WORK EXPERIENCE

ASP.NET Developer, JustAnswer

Duration: March 2011 – February 2014
Summary:

- An ASP
- NET-driven website to facilitate customers in asking questions and connect them with experts
- Major responsibilities included developing new features to manage customers and experts, and bug fixes

Responsibilities: Developing new features, fixing critical and minor UI/Back-end bugs, writing user stories, participating in daily scrum calls.
Technologies: Visual Studio 2010, .NET Framework 4.0, ASP.NET using C#, MS-SQL Server 2008 R2, AJAX, JavaScript, JQuery, GIT

ASP.NET Developer, Medical Clinic Management Site

Duration: November 2010 – March 2011
Summary:

- A clinic management site that helps managing clinical information online
- Involved in designing and implementing new pages, UI and backend optimizations, and improving database tasks

Responsibilities: Designing and implementing new .aspx pages, developing web user interface, optimizing database tasks.
Technologies: Visual Studio 2010, .NET Framework 4.0, ASP.NET using C#, MS-SQL Server 2008 R2, AJAX, JavaScript, JQuery, GIT

Junior ASP.NET Developer, Estridge Homes

Duration: August 2010 – November 2010
Summary:

- Transitioning a building-selling site to a
- NET Kentico CMS system, including page processing and CMS content development

Responsibilities: Processing WebForms pages, implementing MasterPages, and developing CMS content.
Technologies: Visual Studio 2010, .NET Framework 4.0, ASP.NET using C#, MS-SQL Server 2008 R2, AJAX, JavaScript, JQuery, SVN, Kentico CMS

Junior C# ADO.NET Developer, Dental Clinic Application

Duration: January 2010 – August 2010
Summary: Creating desktop applications for a dental clinic to manage operations, with responsibilities including database connectivity and UI development.
Responsibilities: Designing and implementing database connectivity modules, developing UI based on mock-ups.
Technologies: Visual Studio 2010, .NET Framework 4.0, ASP.NET using C#, MS-SQL Server 2008 R2, SVN

Junior PHP Developer, Glass Store

Duration: January 2010 – April 2010
Summary: Developed an online store for glass products, handling both front-end and back-end implementations along with database design.
Responsibilities: Developing database architecture, implementing UI and back-end, fixing bugs.
Technologies: Text Editor, SVN, JS, PHP, MySQL, APACHE
