

Andrii

SENIOR SOFTWARE DEVELOPER

Embedded Firmware, Embedded Software

Profile

As an expert in hardware and embedded development, I bring extensive practical knowledge of C and C++ technologies. With significant experience in smart-city devices such as electronic ticketing machines, bus driver devices, and more, as well as in sensors, microcontrollers, and antenna and radio telescope control systems, I have a strong foundation in cutting-edge technology.

In addition to my technical expertise, I have over 15 years of teaching experience at a local technical university, where I have developed the ability to explain complex concepts in easy-to-understand terms, enhancing my mentoring, communication, and team cooperation skills.
