Edik B.
Middle Software engineer

SUMMARY

- Active software engineer with over 7 years of professional enterprise experience in developing and maintaining web applications. - Skilled in testing, cloud computing, and web development. - Proficient in HTML5, CSS3, JavaScript, and other web development technologies. - Experienced in both back-end and front-end development, with expertise in creating user-friendly and effective websites and applications. - Strong knowledge of JavaScript frameworks such as Vue.js and React.js. - Familiarity with .NET and .NET Core, as well as ASP.NET MVC and Web API. - Proficient in working with databases such as MSSQL, MySQL, MongoDB, and Postgres. - Experienced in cloud infrastructure platforms like AWS and Google Cloud Platform. - Knowledgeable in CI/CD processes, using tools like Terraform, Gitlab, and Docker. - Advanced English

TECHNICAL SKILLS

Main Technical Skills	JavaScript, HTML5, CSS
Programming Languages	C, C++, JavaScript, Python, TypeScript
.NET Platform	Azure, .NET Core
JavaScript Libraries and Tools	ES6
JavaScript Frameworks	Express, NestJS, Node.js, React, Vue.js
Data Analysis and Visualization Technologies	K-Means
Databases & Management Systems / ORM	Cosmos DB, Microsoft SQL Server, MongoDB, MySQL, PostgreSQL, SQLite
UI Frameworks, Libraries, and Browsers	Ant Design, CSS, HTML5, Socket.io
Cloud Platforms, Services & Computing	AWS, Azure, GCP
Azure Cloud Services	Cosmos DB
Google Cloud Platform	GCP AI
Deployment, CI/CD & Administration	Ansible, Blazor, Helm
Virtualization, Containers and Orchestration	Docker, Kubernetes, Terraform

Operating Systems	Linux, Ubuntu, Unix
Methodologies, Paradigms and Patterns	Razor
SDK / API and Integrations	Windows API
Logging and Monitoring	Zabbix

WORK EXPERIENCE

Software Engineer, Web Development

Duration: 2021 - Present
Summary:

- Creating user−friendly, effective websites, quality web pages, and applications.

Responsibilities: Designing client-side and server-side architecture. Developing functional components using HTML5, CSS3, JavaScript, etc. Writing effective APIs. Providing both Back-end and Front-end development efforts to enhance features of products. Performing appropriate code reviews and tests to identify bugs and technical problems. Troubleshooting, debugging and upgrading existing software.
Technologies: HTML5, CSS3, JavaScript, APIs

Senior Frontend Architect, Team Lead, Volatile Solutions

Duration: 2020 - 2021
Summary:

- Oversaw developers, engineers, and administrators in the management of websites, commercial and tactical networks, systems voice communications and messaging servers
- Reduced development budget by 40 percent through streamlined processes, accountability, training, and new tools and resources
- Hired to turn around underperforming departments through upgrades in technology and new relationships with vendors and clients
- Increased the MRR by special strategies and tactics compared to the last years by 250%

Responsibilities: Managing developers, engineers, and administrators. Streamlining processes and reducing development budget. Upgrading technology and building relationships with vendors and clients. Implementing strategies to increase MRR.

Full-Stack Developer, Team Lead, Volo

Duration: 2015 - 2020
Summary:

- Designed the system architecture; implementation, bug fixing, and improving the solution stability, performance, and security
- Worked on both backend (NET/ NET Core Services) and frontend parts (Blazor, Angular)
- Experienced in the design, development, and support of a number of web-based applications, utilizing .NET, XML, web services, and client-server techniques

- Participated in user requirements gathering, project planning, design, implementation, and testing
- Provided technical expertise and organizational skills to a team of developers
- Managed the team of 10 people

Responsibilities: Designing system architecture; implementing bug fixes and improvements. Working on both backend and frontend development. Participating in requirements gathering, project planning, design, implementation, and testing. Providing technical expertise and organizational skills. Managing a team of 10 people.
Technologies: .NET, XML, web services, client-server techniques

EDUCATION

- **National University of Architecture and Construction of Armenia**
  Bachelor of Science (BS), Computer Science
