

# David Gevorgyan

## Middle PHP Developer

### SUMMARY

- Software engineer with 4+ years of experience specializing in backend development using PHP, Laravel, Phalcon, and Symfony, delivering optimized web applications and scalable APIs.
- Proficient in database design and management with MySQL, Redis, and Elasticsearch, alongside expertise in queue processing and performance optimization.
- Skilled in cloud infrastructure and DevOps tools including Docker, AWS (EC2, S3, CloudWatch), Azure, Nginx, Linux, and CI/CD pipelines to ensure robust deployment workflows.
- Strong foundation in computer science with a Bachelor's degree, covering algorithms, data structures, design patterns, OOP, SOLID principles, and multiple programming paradigms.
- Experience mentoring developers and integrating complex APIs, with additional knowledge in C++, JavaScript, and machine learning concepts, contributing to diverse project success.

### TECHNICAL SKILLS

|  |  |
|--|--|
| <b>Main Technical Skills</b>                     | PHP (4 yr.), Laravel (2 yr.), MySQL (4 yr.), Redis (4 yr.) |
| <b>Programming Languages</b>                     | JavaScript (1 yr.), PHP (4 yr.)                            |
| <b>.NET Platform</b>                             | Azure (4 yr.)  |
| <b>C++ Libraries and Tools</b>                   | C/C++/C#   |
| <b>PHP Frameworks</b>                            | Laravel (2 yr.), Symfony                                   |
| <b>PHP Libraries and Tools</b>                   | Phalcon  |
| <b>Databases &amp; Management Systems / ORM</b>  | MySQL (4 yr.), Redis (4 yr.)                               |
| <b>UI Frameworks, Libraries, and Browsers</b>    | CSS (1 yr.), HTML (1 yr.)                                  |
| <b>Cloud Platforms, Services &amp; Computing</b> | Azure (4 yr.)  |
| <b>Amazon Web Services</b>                       | AWS CloudWatch (4 yr.), AWS EC2 (4 yr.), AWS S3 (4 yr.)    |
| <b>Scripting and Command Line Interfaces</b>     | Bash   |
| <b>Deployment, CI/CD &amp; Administration</b>    | CI/CD  |

|   |                 |
|---|-----------------|
| <b>Virtualization, Containers and Orchestration</b> | Docker (4 yr.)  |
| <b>Version Control</b>                              | Git (4 yr.)     |
| <b>Operating Systems</b>                            | Linux (4 yr.)   |
| <b>Web/App Servers, Middleware</b>                  | Nginx           |
| <b>QA, Test Automation, Security</b>                | Postman (4 yr.) |

## WORK EXPERIENCE

### Back-end Developer - Red Lab (Online Stores and Administrative System Development)

**Duration:** 2023 – 2025

**Summary:**

- Development and optimization of web applications including online stores and administrative systems using PHP Laravel
- The projects involved integration with various APIs and creation of custom user interfaces for administrative dashboards, aiming to enhance e-commerce and business management capabilities

**Responsibilities:**

- Developed and optimized web applications using PHP Laravel framework.
- Integrated various third-party APIs to extend application functionality.
- Designed and implemented custom user interfaces for administrative dashboards.
- Maintained application performance and reliability.

**Technologies:** PHP (Laravel), MySQL, Redis, Git, Docker, Elasticsearch, Linux, Postman

### Back-end Developer - Elite Dev Squad (Web Application Development and Optimization)

**Duration:** 2025 – Present

**Summary:**

- Development and optimization of web applications with a focus on backend systems and APIs
- The role includes mentoring junior developers and working with scalable backend architectures using modern PHP frameworks and cloud services

**Responsibilities:**

- Developed and optimized backend web applications.
- Mentored junior developers to improve team skills and code quality.
- Implemented backend architecture and RESTful services.
- Managed deployment and monitoring using AWS and Azure cloud services.

**Technologies:** PHP, Phalcon, Symfony, MySQL, Redis, Git, Docker, Elasticsearch, AWS (EC2, S3, CloudWatch), Azure, Postman, Bash, Linux

## Full stack Developer - Webex (Website Design and Development)

**Duration:** 2020 – 2021

### Summary:

- Responsible for designing, coding, and modifying websites from layout to function according to client specifications
- The focus was on creating visually appealing, user-friendly websites with clear navigation to enhance user experience

### Responsibilities:

- Designed and developed websites with a focus on user-friendly design and clear navigation.
- Implemented front-end and back-end functionality according to client requirements.
- Collaborated with clients to ensure specifications were met.

**Technologies:** HTML, CSS, JavaScript, PHP, MySQL, Git

## EDUCATION

- **Bachelor's Degree, Computer Science**

National Polytechnic University of Armenia (NPUA)  
2017 – 2021

- **Bachelor's Degree, Computer Science**

Synopsys Armenia Educational Department (SAED), studied Computational Mathematics, Discrete Math, Math Analyze, Theory of probability, Physics, Computer Architecture, Fundamental hardware concepts (CPU, memory, interrupts), low-level programming in Assembler (i386), C under Linux. Programming paradigms: declarative, functional, imperative, and OOP. Design Patterns, Data Structures, Theory of Algorithms, Graph Theory.  
2019 – 2021

## CERTIFICATION

- **Intermediate level Machine Learning**

Armenian Code Academy  
October 2020 - April 2021
