

ALEXANDER GEORGIEV

Junior Junior C# Developer

SUMMARY

Dynamic software engineer with a robust engineering background, transitioning from construction to software development. Over four years of problem-solving in design engineering, augmented by C# programming proficiency and a track record of successful project completion. Expertise in .NET, Entity Framework, and SQL, with recent focus on full-stack development projects like Nimble and GameOverflow. Exhibits a keen understanding of software development practices, adept at using modern technologies and methodologies. Recognized for optimizing performance, enhancing process efficiency, and meeting crucial deadlines.

TECHNICAL SKILLS

Main Technical Skills	.NET, C/C++/C#, SQL
Programming Languages	JavaScript
.NET Platform	ASP.NET Core Framework, Entity Framework, .NET
C++ Libraries and Tools	C/C++/C#
Databases & Management Systems / ORM	Microsoft SQL Server, SQL
UI Frameworks, Libraries, and Browsers	CSS, HTML
Cloud Platforms, Services & Computing	Clouinary
Mail / Network Protocols / Data transfer	JWT
SDK / API and Integrations	JWT, Swagger
Operating Systems	Unix
Other Technical Skills	External services integration

WORK EXPERIENCE

C# Developer, Nimble - Virtual Wallet

Duration: 08/2024 - 09/2024

Summary: Contributed to the development of a virtual wallet system allowing users to manage currency funds and interact with credit/debit cards.

Responsibilities: While working on the project I came upon technologies that I had never

used before like Cloudinary, consuming external API and SNM

Technologies: ASP.NET Core, Entity Framework, Swagger, JWT, SqlServer, external API, Cloudinary, System.Net.Mail

C# Developer, GameOverflow - Forum

Duration: 07/2024 - 08/2024

Summary: Constructed a forum system specialized for gamers with different user roles and functionalities.

Responsibilities: Implementing the project helped me understand how to use Entity Framework, master JWT authentication, layered architecture and dependency injection.

Technologies: ASP .NET, Entity Framework, Swagger, JWT, SqlServer

EDUCATION

- **SoftUni**
JavaScript Advanced
09/2024 - Present
- **Telerik Academy**
Alpha C# Track
03/2024 - 09/2024
- **Technical University of Sofia - Plovdiv branch**
Mechanical and Instrument Engineering
09/2019 - 06/2023
- **Technical University of Sofia**
Industrial Engineering
09/2015 - 06/2019

CERTIFICATION

- **Business communication course**
Skills covered by the course are improved organizational practices and reduce error during communications. The course provided insight in both communication skills and processes, necessary to achieve effective business communication.
- **Assertive behaviour course**
The completed Assertive behaviour course allows for better understanding of the communication styles of colleagues and clients. With that knowledge a person could tailor their approach to reduce combative responses and ensure clear and functional lines of communication.
