

Kostantyn B.

Senior Senior Mobile Developer

SUMMARY

Seasoned Senior Mobile Developer with 6 years of experience, specializing in native iOS (Swift, UIKit, SwiftUI) and cross-platform (Flutter) mobile app development. Demonstrated expertise in full lifecycle project management, architecting robust app solutions with a focus on the Blockchain, Transportation, Education, HealthCare, and E-commerce sectors. Proficient in leveraging modern development tools, such as Alamofire, Core Data, and Combine. Effective at leading and mentoring teams, directly engaging with clients, and contributing to high-quality software with experience in SDLC, MVVM, Agile methodologies, and CI/CD pipelines. Recognized for refactoring and optimizing codebases for scalability and performance.

TECHNICAL SKILLS

Main Technical Skills	Facebook Auth (6 yr.), Dart (6 yr.), Swift (6 yr.), UIKit (6 yr.), SwiftUI
Programming Languages	Dart (6 yr.), Kotlin, Swift (6 yr.), TypeScript
JavaScript Frameworks	Angular, Node.js, React
.NET Platform	ASP.NET Core Framework, Identity Server
C++ Libraries and Tools	C/C++/C#
Mobile Frameworks and Libraries	Coil, Crashlytics, Data binding, Flutter, KMM, Koin, Kotlin Coroutines, LiveData, Retrofit2
JavaScript Libraries and Tools	Ethers.js, React Navigation, Redux-Saga
Android Libraries and Tools	Koin, Kotlin
Databases & Management Systems / ORM	MongoDB
UI Frameworks, Libraries, and Browsers	Bootstrap 4, HTML5, Kendo UI, SCSS, Socket.io
Cloud Platforms, Services & Computing	Firebase Cloud Messaging
Azure Cloud Services	Azure Blockchain
Industry Domain Experience	Healthcare, retail

Collaboration, Task & Issue Tracking	Atlassian Trello
BlockChain and Decentralized Software	Azure Blockchain, Ethers.js
Version Control	BitBucket, Github Actions
SDK / API and Integrations	Collections API, DI, Facebook Auth (6 yr.), Google Maps API, Swagger
UI/UX/Wireframing	Figma
Deployment, CI/CD & Administration	GitLab CI
Methodologies, Paradigms and Patterns	Kanban, MVVM, Scrum
Message/Queue/Task Brokers	MQTT, RabbitMQ
QA, Test Automation, Security	Postman, TestFlight
iOS Libraries and Tools	SwiftUI, TestFlight, UIKit (6 yr.)
Mail / Network Protocols / Data transfer	WebRTC, WebSockets
Other Technical Skills	Bloc, Dispatch, go-kit, POM, POS, Room Dagger 2, SOUP

WORK EXPERIENCE

iOS developer, Digital certificates on the Blockchain

Duration: October 2021 - Present

Summary: Mobile application for creating and registering ownership of E-commerce assets on the Ethereum blockchain, with features like QR scanning to check product originality and biometric authentication.

Responsibilities: Project architecture design and implementation, defining interface communications between client and API, sprint planning participation, environment setup and configuration, team and customer communication, client and API application's structure development, code refactoring and improvements.

Technologies: Swift UI, Swift, Swift Combine, MVVM+ MVI, KMM

Flutter developer, App for the cargo transportation

Duration: March 2022 - August 2022

Summary: A logistics app providing drivers with approved delivery orders, tracking, and support communication, complemented by a CRM for order handling.

Responsibilities: Project architecture design and implementation, participating in sprint planning and task evaluation, code refactoring and improvements.

Technologies: Flutter, Bloc, Firebase Push Notification, WebSocket (STOMP), Google Maps, Direction API

Flutter developer, Fast job marketplace

Duration: December 2021 - February 2022

Summary: E-commerce platform facilitating rapid job matchmaking and including features such as internal chat, push notifications, and reviews.

Responsibilities: New project implementation, project architecture design, sprint planning participation, defining interface communications between client and API, code refactoring and improvements.

Technologies: Flutter, Bloc, Firebase Push Notification, WebSocket (STOMP), Google Maps, Direction API

iOS developer, Staff management app

Duration: October 2021 - December 2021

Summary: A staff management app for tracking project details, employee tasks, and leave management.

Responsibilities: New project implementation, project architecture design, defining interface communications between client and API, sprint planning participation, code review, and improvements.

Technologies: Swift, SwiftUI, Combine, Alamofire

iOS developer, Lube auto

Duration: October 2021 - Present

Summary: An application providing data about car auctions, enabling participation, and offering the ability to store auction details and receive updates.

Responsibilities: New feature implementation, sprint planning participation, code refactoring and improvements.

Technologies: Swift, SwiftUI, Combine, KMM, Firebase Messaging

iOS developer, Education platform with online chat

Duration: December 2021 - Present

Summary: Learning management system designed to connect teachers, students, parents, and administrators, including features like a digital library and live chat.

Responsibilities: New feature implementation, project architecture design, sprint planning participation, setup and configuration of environments, team and customer communication, developing Client and API application's structure, code refactoring and improvements.

Technologies: Swift, UIKit, Kotlin, ViewModel, Retrofit2, Room, LiveData, Data binding, Kotlin Coroutines, Koin, Coil, Angular 9, React 16.13.1, Redux 4.0.5, TypeScript 3.8, HTML5, SCSS, Bootstrap 4, KendoUI, .NET Core 3.1, ASP.NET Core, C#, IdentityServer4, RabbitMQ, FeathersJS, media soup, Socket.io, WebRTC, Node.js 14.4.0, MongoDB 4.2.

iOS developer, Trading platform

Duration: November 2018 - September 2021

Summary: Trading platform app to buy and sell CFDs on various assets with features like direct trading from mobile devices.

Responsibilities: New feature implementation, defining interface communications between client and API, sprint planning participation, environment setup and configuration, team and customer communication, code refactoring and improvements.

Technologies: Swift, UIKit, Alamofire, Core Data, Socket IO Swift, Promise Kit, Firebase

iOS developer, Health and fitness application

Duration: July 2018 - May 2021

Summary: A health and fitness application for tracking exercises, activities, meals, with chart visualizations.

Responsibilities: Project architecture design and implementation, sprint planning participation, team management, direct communication with team and customer, code review, code refactoring and improvements.

Technologies: Swift, UIKit, Alamofire, ObjectMapper
