

Mohd Anas
Senior React js | Node js | Nest js | Typescript |
Javascript | Laravel | Codeiniter | MERN Stack
Developer

SUMMARY

- Software engineer with 7+ years of experience specializing in MERN stack, PHP, and modern JavaScript frameworks including React.js, Node.js, and Nest.js.
- Proficient in TypeScript, Laravel, CodeIgniter, MongoDB, and MySQL, delivering scalable web applications following best SDLC practices.
- Strong foundation in computer science with a B.Tech degree, applying engineering principles to develop robust backend and frontend solutions.
- Experienced in agile methodologies and software design patterns, contributing to projects at RipenApps
- Demonstrated ability to integrate complex systems and optimize performance in diverse domains, ensuring maintainability and code quality.

TECHNICAL SKILLS

Main Technical Skills	React (7 yr.), Node.js (7 yr.), NestJS (7 yr.), TypeScript (7 yr.), JavaScript (7 yr.)
Programming Languages	JavaScript (7 yr.), TypeScript (7 yr.)
JavaScript Frameworks	NestJS (7 yr.), Node.js (7 yr.), React (7 yr.)

WORK EXPERIENCE

MERN stack, PHP Developer - RipenApps (Various projects at RipenApps)

Summary:

- RipenApps is a mobile app development company specializing in delivering innovative and scalable solutions using modern technologies
- The projects involve full-stack development using MERN stack and PHP to build responsive and efficient web and mobile applications

Responsibilities:

- Developing and maintaining web and mobile applications using MERN stack and PHP.
- Collaborating with cross-functional teams to define, design, and ship new features.
- Ensuring the performance, quality, and responsiveness of applications.

Technologies: React.js, Node.js, MongoDB, Express.js, PHP

Software Engineer

Summary:

- The projects involved software engineering tasks focused on developing mobile and web applications to meet client requirements

Responsibilities:

- Designing, developing, and implementing software solutions.
- Working closely with clients and team members to deliver high-quality applications.
- Maintaining code quality and application performance.

Software Developer

Summary:

- The projects included developing software applications using PHP frameworks and database management

Responsibilities:

- Developing software applications using PHP frameworks such as Laravel and CodeIgniter.
- Managing databases using MySQL and MongoDB.
- Collaborating with team members to deliver project milestones.

Technologies: PHP, Laravel, CodeIgniter, MySQL, MongoDB

EDUCATION

- B.tech, Computer Science
May 2012 - May 2016
