### QA Automation Engineer, Namogoo

**Duration:** October 2020 – January 2021

**Summary:** Web-based application that can be integrated into E-commerce web applications to enlarge product sales

**Responsibilities:**

- Functional testing of the application, Mobile cross-browser testing, Providing Cypress automated testing for the UI Part of the Web Application.
- Design and update the test documentation (test cases, bug reports, checklists);
- Perform testing: GUI testing, smoke testing, functional and non-functional testing, cross browsing and cross-platform testing, and Providing Cypress automated testing.
- Looking for mismatches in markup and design using Chrome developer tool and Invision Creating test cases

**Technologies:** Cypress, Chrome Developer Tool, Invision

**QA Automation Engineer, Far eastern hectare**

**Duration:** March 2020 – September 2020

**Summary:** Web-based application for land lease

**Responsibilities:**

- Functional testing of the application Providing Cypress JS automated testing for UI of the web application.
- Design and update the test documentation (test cases, bug reports, checklists);
- Perform testing: GUI testing, smoke testing, functional and non-functional testing, cross-browsing, and cross-platforms testing
- Looking for mismatches in markup and design using Chrome developer tool and Invision Creating test cases

**Technologies:** Cypress, Chrome Developer Tool, Invision

**QA Automation Engineer, Itsapark**

**Duration:** December 2019 – February 2020

**Summary:** Web-based online fashion platform for H&M company

**Responsibilities:**

- Testing web-based fashion platform for H&M company;
- Design and update the test documentation (test cases, bug reports, checklists);
- Perform testing: GUI testing, smoke testing, functional and non-functional testing, cross-browsing and cross-platform testing, writing, and Mobile cross-browser testing.
- Looking for mismatches in markup and design on Android devices using the Chrome developer tool and Invision
- Creating Test cases in TestPad Working with Contentful Providing Selenium WebDriver + Java automated testing

**Technologies:** Selenium WebDriver, Java, Chrome Developer Tool, Invision, TestPad, Contentful

### **QA Engineer, [NDA]**

**Duration:** March 2019 – December 2019

**Summary:** Web-based online booking system developed in Azure for rent

#### **Responsibilities:**

- Testing web-based online booking system;
- Providing Selenium WebDriver Java automated testing Design and updating the test documentation (test cases, bug reports, checklists);
- Perform testing: GUI testing, smoke testing, functional and non-functional testing.
- Providing mobile application testing
- Looking for mismatches in markup and design on Android devices using the Chrome developer tool
- Checking for design mismatches on IOS using Pixel Ruler

**Technologies:** Selenium WebDriver, Java, Chrome Developer Tool, Pixel Ruler

### **QA Engineer, Trulet**

**Duration:** May 2018 - March 2019

**Summary:** Mobile and Web applications which provide solutions for people to rent apartments in Australia

#### **Responsibilities:**

- Test case creation, editing, and execution;
- Automation test scripts using JS and Cucumber Regression, Functional, Smoke manual testing; Interacting with customers (via calls and texting);
- Identifying, recording, and track bugs;
- Looking for mismatches in markup and design on mobile and web applications using Chrome developer tool Zeppelin.
- Checking for design mismatches on IOS devices using a pixel ruler.

**Technologies:** Cucumber, Chrome Developer Tool, Zeppelin, Pixel Ruler

### **QA Engineer, Dairyland.com**

**Duration:** December 2017 – May 2018

#### **Summary:**

- Web online laboratory developed in Azure written using Angular and node

- js which is based in a laboratory located in Wisconsin, USA, that specializes in the analysis of soil, forages, molds, grains, mycotoxins, and water

**Responsibilities:**

- Test case creation, editing, and execution;
- Mobile manual application testing using Android and IOS devices;
- Acceptance, Regression, Functional, Smoke manual testing;
- Providing automated regression testing using Java + Selenium WebDriver, Junit
- Interacting with customers (via video calls and email);
- Identify, record, and track bugs using Jira; Black box/grey box testing.

**Technologies:** Selenium WebDriver, Java, Junit, TestLink, Jira

**QA Engineer, FloristSupply**

**Duration:** May 2017 - November 2017

**Summary:**

- Online Internet shop written using Angular and Node
- js which specializes in selling fresh flowers, permanent botanicals, and a collection of quality florist essentials, must-have giftware, and modern décor

**Responsibilities:**

- Test case creation, editing, and execution;
- Acceptance, Regression, Functional, Smoke manual testing; Interacting with customer (via video calls and email);
- Providing automated regression and smoke testing using Java + Selenium WebDriver
- Identify, record, and track bugs using Jira;
- Black box/grey box testing. Mobile manual application testing using Android and IOS devices

**Technologies:** Selenium WebDriver, Java, TestLink, Jira

**QA Engineer, [NDA]**

**Duration:** June 2017 - April 2018

**Summary:**

- Fully functional web portal
- Written developed in Azure Includes client-side and administrator-side parts, dynamic management system for products and offers, reports and financial management, billing system, mail and custom request services

**Responsibilities:** Analysis of business processes; Analysis of customer requirements; Completeness check implementation of the requirements; Testing. Providing automated testing

using Java + Selenium WebDriver

**Technologies:** Selenium WebDriver, Java, MS Word, MS Excel, TFS, MS SQL Server Management Studio, MS Visual Studio

### **QA Engineer, [NDA]**

**Duration:** August 2016 – May 2017

**Summary:**

- Municipal Real Estate Management web portal
- Has full management functionality
- Includes statistics, analysis, charts, reports, an information retrieval system, and integrations for external municipal services

**Responsibilities:** Analysis of business processes; Analysis of customer requirements; Completeness check implementation of the requirements; Testing.

**Technologies:** MS Word, MS Excel, TFS, MS SQL Server Management Studio, MS Visual Studio

### **QA Engineer, Analytical platform system (Prognoz Platform)**

**Duration:** January 2016 - July 2016

**Summary:**

- Business intelligence desktop/web server platform
- Allows displaying statistics and providing analysis, creating charts, tables, and reports, including information retrieval system, working with OLAP (online analytical processing), management panel, logging system, and creation of analytical panels for analysis
- IDE customized for desktop/web applications

**Responsibilities:** Analysis of customer requirements; Completeness check implementation of the requirements; Testing.

**Technologies:** MS Word, MS Excel, TFS, MS Visual Studio

### **QA Engineer, Statistical Data Portal (DpEngine)**

**Duration:** July 2015 – December 2015

**Summary:**

- Multilingual Business Intelligence web portal developed in Azure for the African Development Bank
- The solution provides useful tools to access and disseminate the official statistical data of African countries

- With the introduction of the portal, the need to create annual AfDB reports became obsolete
- Analytically processed information can be used in presentations or research materials
- The solution has been successfully integrated into the AfDB Intranet
- Employees of twenty-four bank offices in African countries use the Statistical Data Portal in their daily work

**Responsibilities:** Analysis of customer requirements; Completeness check implementation of the requirements; Testing.

**Technologies:** MS Word, MS Excel, TFS, MS SQL Server Management Studio

## **EDUCATION**

### **National Technical University “Kharkiv Polytechnic Institute”**

Engineer-defectoscopist, master

2009 - 2014

### **LemonSchool**

The general course of QA

2014-2015
