

Yevhenii K.

Middle Front-end Developer

SUMMARY

- Self-motivated and result-driven front-end developer with 5+ years of experience - Skilled in Angular and JavaScript, with extensive experience in their development and ecosystem - Strong ability to write clean code, debug performance issues, and implement features based on client and user needs - Possesses good logical thinking and a high level of responsibility - Excellent attention to detail and ability to work well in a team - Proficient in various programming languages and technologies such as JavaScript, TypeScript, HTML, CSS, SASS, Angular 2+, npm, Webpack, Redux, Rest API, RWD, Figma, Bootstrap, rxJS, docker, ionic, firebase, and JWT - Experienced in working with databases like MongoDB and MySQL, and familiar with source controls like GIT and tracking systems like Jira and Trello. - Intermediate English - Availability starting from ASAP

TECHNICAL SKILLS

Main Technical Skills	Angular
Programming Languages	JavaScript, TypeScript
JavaScript Frameworks	Angular
Mobile Frameworks and Libraries	Ionic
JavaScript Libraries and Tools	NPM, Redux, RxJs, Webpack
Databases & Management Systems / ORM	Firebase, MongoDB, MySQL
UI Frameworks, Libraries, and Browsers	Bootstrap, CSS, HTML, SASS
Methodologies, Paradigms and Patterns	Agile, Scrum
Collaboration, Task & Issue Tracking	Atlassian Trello, Jira
Virtualization, Containers and Orchestration	Docker
UI/UX/Wireframing	Figma, RWD(Responsive Web Design)
Platforms	Firebase
Version Control	Git

Mail / Network Protocols / Data transfer	JWT
SDK / API and Integrations	JWT, RESTful API
Operating Systems	macOS, Windows

WORK EXPERIENCE

Team-lead, Front-end development, Project 1

Duration: Feb 2023 – July 2023

Summary: It is the modern QA test case management system. It allows QA's to organize their test cases, diversify them according to different categories, therefore gather them into plans and build clear-cut test runs for QA engineers to follow.

Responsibilities: Code review, developer assistance.

Technologies: Angular 14, angular.js, coffeeScript, haml

Full-stack development, Project 2

Duration: Mar 2022 - Feb 2023

Summary: The app allows you to perform a vision test and then get a report with the results of the test. Admin panel to manage users and reports.

Responsibilities: Development of new functionality, bug fixes.

Technologies: Node.js, React.js, Firebase

Full-stack development, Project 3

Duration: Apr 2021- Feb 2023

Summary: Application for food testing, allows you to use the device to analyze the content of various substances in food, then view and analyze this data.

Responsibilities: Client and server-side development, performance optimization, bug fixes, mobile app development.

Technologies: Angular, Node.js, MySQL, Ionic, docker

Full-stack development, Project 4

Duration: Sep 2020 - Apr 2021

Summary: The application for searching / creating vacancies on which to create, find and add to favorites different vacancies. In addition, there is an opportunity to create your own resume.

Responsibilities: Functional development and integration, database and server setup, user interface development

Technologies: Angular, Node.js, MongoDB, JWT, HTML, CSS

Front-end development, Project 5

Duration: Aug 2020 - Sep 2020

Summary: Norwegian project designed for management and sailing of painting. Business platform includes user profiles, galleries, deals and transactions.

Responsibilities: Bug fixes, interface performance optimizations.

Technologies: Angular 9, Bootstrap, SASS

Front-end development, Project 6

Duration: May 2020 - Aug 2020

Summary: Service allows users to buy pets food and make subscriptions. Standard signing up, payment and delivery systems. Progress: development from scratch.

Responsibilities: User interface development, design and functionality integration, performance optimization and cross-browser optimization.

Technologies: Angular 9, SASS

Front-end development, Project 7

Duration: Feb 2020 - May 2020

Summary: Blog with admin panel, attachments, comments, and user profile.

Responsibilities: Bug fixes.

Technologies: Angular, Firebase

Front-end development, Project 8

Duration: Dec 2019 – Feb 2020

Summary: Application for learning foreign words and then checking them.

Responsibilities: Development of functionality and user interface, writing tests.

Technologies: Angular 2+

Front-end development, Project 9

Duration: Sept 2019 – Dec 2019

Summary: Generates CSS components according to the specified parameters

Responsibilities: Development of functionality and user interface, writing tests.

Technologies: Angular 2+

EDUCATION

- **School of Computer Science and Skills, Lodz**

Courses: MEAN, Angular, Node, Express, Mongo. Service creation from scratch
2017-2022

CERTIFICATION

- **Node JS. Practical course**

August 2020 - August 2020

- **BECOME A SENIOR FRONT END DEVELOPER**

March 2020 - April 2020

- **Angular 9 Full Course**

September 2019 - October 2019

- **JavaScript fundamentals**

August 2019 - September 2019
