

Vyacheslav N.

Senior DevOps Engineer

SUMMARY

- Experienced DevOps Engineer with a proven track record in managing cloud environments, Kubernetes environments, Dockerizing applications, configuring CI/CD, and monitoring servers and applications. - Skilled in disaster recovery and optimization of Docker images with various apps such as NodeJS and .Net. - Successfully managed Proxmox VE clusters, administered a park of Kubernetes clusters, and managed Docker Swarm clusters. - 5+ years DevOps Engineer - 7+years site reliability Engineer - Upper-Intermediate English - Available ASAP

TECHNICAL SKILLS

| | |
|---|--|
| Main Technical Skills | DevOps |
| Programming Languages | Go, Groovy, Python (4 yr.) |
| Databases & Management Systems / ORM | ELK stack (Elasticsearch, Logstash, Kibana), InfluxDB, MongoDB, MySQL, PostgreSQL, Redis |
| Cloud Platforms, Services & Computing | AWS, GCP |
| Azure Cloud Services | AKS, Hyper-V |
| Amazon Web Services | AWS Elastic Kubernetes Service (EKS), AWS S3 (2 yr.) |
| Google Cloud Platform | Google Kubernetes Engine (GKE) |
| Deployment, CI/CD & Administration | Ansible, DevOps, GitLab CI, Helm, Jenkins, Pulumi |
| Scripting and Command Line Interfaces | Bash |
| Virtualization, Containers and Orchestration | Docker, Docker Swarm, Kubernetes, LXC, Terraform (3 yr.), VMWare ESXi |
| Version Control | Git, GitHub |
| Logging and Monitoring | Grafana, Nagios, Prometheus, Sentry, Zabbix |
| Operating Systems | Linux |
| Web/App Servers, Middleware | Nginx |
| Other Technical Skills | EFK stack (Elasticsearch, Fluentd and Kibana), Elastic Stack, Traefik, Zipkin |

EXPERIENCE

DevOps Engineer, SERVERBEE

Oct 2021 - Now

Responsibilities:

- Manage cloud environments
- Manage Kubernetes environments
- Dockerize applications
- Configure CI/CD using best practices for better performance
- Monitoring servers, applications
- Disaster recovery

Technologies: AWS, GCP, Gitlab CI, GitHub Action, Docker, Kubernetes, Prometheus, Grafana, Terraform, Ansible, Postgresql, MongoDB, Nginx, Linux

DevOps Engineer

Jan 2021 - Oct 2021

Responsibilities:

- Management of cloud environments
- Integration of the Kubernetes clusters
- Monitoring of servers, deployments
- Management of Builds, Deployments with Using CI/CD
- Troubleshooting
- Optimization of Docker images with Nodejs and .Net apps

Technologies: Linux, LXC, Jenkins, In_luxDB, Prometheus, Docker, Grafana, Ansible, Proxmox VE, Sentry

DevOps Engineer, IT SERVICE COMPANY

Jun 2019 - Jan 2021

Responsibilities:

- Management of Proxmox VE clusters
- Administering a park of Kubernetes clusters
- Monitoring of servers, deployments
- Management of builds, and deployments using CI/CD
- Troubleshooting
- Optimization of Docker images with NodeJS apps

Technologies: Linux, Docker, LXC, Proxmox VE, Kubernetes, Jenkins, Prometheus, Grafana, Ansible, Fedora CoreOS, Terraform, Pulumi, Atlassian stack

DevOps Engineer, CUSTOM SAAS DEVELOPMENT

Dec 2018 - Jun 2019

Responsibilities:

- Management of Proxmox VE clusters
- Management of builds, and deployments using CI/CD
- Monitoring of servers
- Managing Docker Swarm clusters

Technologies: Linux, LXC, Jenkins, In_luxDB, Prometheus, Docker, Grafana, Ansible, Proxmox VE, Sentry

EDUCATION

Master's degree, KHARKIV NATIONAL UNIVERSITY OF RADIO ELECTRONICS (INFORMATION AND NETWORK ENGINEERING)

2019

Bachelor's degree, KHARKIV NATIONAL UNIVERSITY OF RADIO ELECTRONICS (TELECOMMUNICATION)

2017
