

Hiring software engineer as easy as calling a taxi.

Anton U.

Go Software Engineer

SUMMARY

- Software Engineer with more than 3 years of commercial experience in software development
- Solid expertise in development using Golang
- Experience in MVC that use Domain-Driven Design architecture
- Experience in development using SOLID, DRY, KISS
- Hands-on experience with third-party API integration
- Upper-Intermediate English
- Available ASAP

SKILLS

Main Technical Skills	Go
Programming Languages	C#, JavaScript
UI Frameworks, Libraries, and Browsers	CSS, HTML
Go Frameworks and Libraries	Gin
JavaScript Frameworks and Libraries	React
Databases & Management Systems / ORM	Microsoft SQL Server, MongoDB, MySQL, PostgreSQL, Redis
Cloud Platforms, Services & Computing	AWS, Linode
Collaboration, Task & Issue Tracking	Atlassian Trello, Jira
Virtualization, Containers and Orchestration	Docker, Docker Swarm
Version Control	Git
Mail / Network Protocols / Data transfer	GRPC

Deployment, CI/CD & Administration	Jenkins, Kubernetes
Methodologies, Paradigms and Patterns	Kanban, microservices architecture, Scrum
Operating Systems	Linux
Message/Queue/Task Brokers	RabbitMQ
SDK / API and Integrations	RESTful API
Other Technical Skills	chi, Fiber

PROJECT DESCRIPTION

Golang developer

March 2022 – January 2023

Description: Social network for sharing photos

Responsibilities:

- Micro/macro architectural design
- Add unit/functional test coverage
- setup CI/CD pipelines
- setup AWS instances
- setup app for Facebook and google authorization
- application architecture,
- database design
- took part in meetings
- create clean, efficient code based on requirements

Technologies: Golang, Docker, Jenkins, GIT, MySQL, Redis, AWS

Golang developer

June 2021 – February 2022

Description: App for automatization work of restaurant stuff

Responsibilities:

- micro-architectural design
- unit/functional test coverage
- automatization of written code
- databases setup
- application architecture,

- took part in meetings
- create clean, efficient code based on requirements

Technologies: Golang, JavaScript, Docker, GIT, Postgres, Redis, Mongo, React, Rabbitmq, AWS

Golang developer

March 2020 - May 2021

Description: Logistics application (mail delivery)

Responsibilities:

- writing code for microservices
- unit/functional testing
- create clean, efficient code based on requirements
- application architecture,
- database design
- took part in meetings

Technologies: Golang, Docker, GIT, K8S, Mongo, PostgreSQL, Rabbitmq, gRPC, AWS

Golang developer

September 2019 – March 2020

Description: Real estate liquidity prediction platform

Responsibilities:

- Creating new microservices based on Go
- Create clean, efficient code based on requirements
- Development of new functionality
- Add unit/functional test coverage

Technologies: Golang, PostgreSQL, Redis, AWS, Docker, K8S

Golang developer, Bee Workers

April 2019 – October 2019

Description: Job platform for retired people

Responsibilities:

- Micro/macro architectural design
- Create clean, efficient code based on requirements
- Development of new functionality
- Add unit/functional test coverage

Technologies: Golang, PostgreSQL, Docker, K8S, Git

EDUCATION

Kharkiv National University of Radio Electronics

Bachelor of Software Engineering
