

# Anton U.

## Middle Go Software Engineer

### SUMMARY

- Software Engineer with more than 3 years of commercial experience in software development - Solid expertise in development using Golang - Experience in MVC that use Domain-Driven Design architecture - Experience in development using SOLID, DRY, KISS - Hands-on experience with third-party API integration - Upper-Intermediate English - Available ASAP

### TECHNICAL SKILLS

<b>Main Technical Skills</b>	Go
<b>Programming Languages</b>	C#, Go, JavaScript
<b>AI &amp; Machine Learning</b>	chi
<b>Go Frameworks</b>	Fiber, Gin
<b>Go Libraries and Tools</b>	Gin
<b>JavaScript Frameworks</b>	React
<b>Databases &amp; Management Systems / ORM</b>	Microsoft SQL Server, MongoDB, MySQL, PostgreSQL, Redis
<b>UI Frameworks, Libraries, and Browsers</b>	CSS, HTML
<b>Cloud Platforms, Services &amp; Computing</b>	AWS, Linode
<b>Collaboration, Task &amp; Issue Tracking</b>	Atlassian Trello, Jira
<b>Virtualization, Containers and Orchestration</b>	Docker, Docker Swarm, Kubernetes
<b>Version Control</b>	Git
<b>Mail / Network Protocols / Data transfer</b>	GRPC
<b>Deployment, CI/CD &amp; Administration</b>	Jenkins
<b>Methodologies, Paradigms and Patterns</b>	Kanban, microservices architecture, Scrum
<b>Operating Systems</b>	Linux

<b>Message/Queue/Task Brokers</b>	RabbitMQ
<b>SDK / API and Integrations</b>	RESTful API

## PROJECT DESCRIPTION

### Golang developer

March 2022 – January 2023

**Description:** Social network for sharing photos

#### Responsibilities:

- Micro/macro architectural design
- Add unit/functional test coverage
- setup CI/CD pipelines
- setup AWS instances
- setup app for Facebook and google authorization
- application architecture,
- database design
- took part in meetings
- create clean, efficient code based on requirements

**Technologies:** Golang, Docker, Jenkins, GIT, MySQL, Redis, AWS

### Golang developer

June 2021 – February 2022

**Description:** App for automatization work of restaurant stuff

#### Responsibilities:

- micro-architectural design
- unit/functional test coverage
- automatization of written code
- databases setup
- application architecture,
- took part in meetings
- create clean, efficient code based on requirements

**Technologies:** Golang, JavaScript, Docker, GIT, Postgres, Redis, Mongo, React, Rabbitmq, AWS

### Golang developer

March 2020 - May 2021

**Description:** Logistics application (mail delivery)

**Responsibilities:**

- writing code for microservices
- unit/functional testing
- create clean, efficient code based on requirements
- application architecture,
- database design
- took part in meetings

**Technologies:** Golang, Docker, GIT, K8S, Mongo, PostgreSQL, Rabbitmq, gRPC, AWS

**Golang developer**

September 2019 – March 2020

**Description:** Real estate liquidity prediction platform

**Responsibilities:**

- Creating new microservices based on Go
- Create clean, efficient code based on requirements
- Development of new functionality
- Add unit/functional test coverage

**Technologies:** Golang, PostgreSQL, Redis, AWS, Docker, K8S

**Golang developer, Bee Workers**

April 2019 – October 2019

**Description:** Job platform for retired people

**Responsibilities:**

- Micro/macro architectural design
- Create clean, efficient code based on requirements
- Development of new functionality
- Add unit/functional test coverage

**Technologies:** Golang, PostgreSQL, Docker, K8S, Git

**EDUCATION****Kharkiv National University of Radio Electronics**

Bachelor of Software Engineering
