

Marina

Senior BUSINESS ANALYST

SUMMARY

A business analyst with a rich background in requirements engineering and project management, bringing over 9 years of international experience. Expertise lies in business process analysis, software algorithm description, and prototyping, backed by strong knowledge in domains such as IoT, IIoT, pilotless transport, energy engineering, and healthcare. Proficient in programming languages including ST, SQL, and PL/SQL and has a deep understanding of cloud services and cybersecurity. Demonstrates proficiency in requirements management and process modeling tools, such as JIRA, Confluence, Draw.io, and Visio, and in prototyping with Balsamiq and Figma. Proven track record in using Waterfall and Agile methodologies effectively in project execution.

TECHNICAL SKILLS

Main Technical Skills	Business Analysis (9 yr.), Prototyping, 3D Modelling, SQL, BPMN (3 yr.)
Programming Languages	SAP ABAP
JavaScript Libraries and Tools	RequireJS (9 yr.)
Data Analysis and Visualization Technologies	Business Analysis (9 yr.)
Databases & Management Systems / ORM	SQL
Amazon Web Services	AWS CloudFront
Google Cloud Platform	Google Docs
Azure Cloud Services	Microsoft Azure API
UI/UX/Wireframing	3D Modelling, Balsamiq (1 yr.), Draw.io (4 yr.), Figma (3 yr.), Microsoft Visio, Prototyping
Virtualization, Containers and Orchestration	App-V
Collaboration, Task & Issue Tracking	Atlassian Confluence, Jira

Third Party Tools / IDEs / SDK / Services	Autodesk Navisworks, Office 365
Methodologies, Paradigms and Patterns	BPMN (3 yr.), Waterfall
Project Management & Administration	Flow chart
SDK / API and Integrations	Microsoft Azure API
Other Technical Skills	OMG UML (3 yr.), PL-Sql, SCADA, UPS, Xmind

WORK EXPERIENCE

Business Analyst, Cybersecurity Platform

Duration: 11.2023 - 02.2024

Summary: Cybersecurity platform leveraging ML and blockchain to process data, generate incident reports, assess risks, and provide recommendations for handling cybersecurity cases.

Responsibilities: Communicating with stakeholders, requirement analysis, risk analysis, designing action flows, specification development, integration documentation, prototyping, collaboration with SecOps engineers, daily meetings with development team.

Technologies: JIRA, Confluence, Figma, Mitre Att&ck Matrix, Draw.io, Bizagi Modeler, Google Docs

Business Analyst, Investment Platform

Duration: 04.2023 - 10.2023

Summary: Investment platform integrating blockchain and AI to assist advisers and brokers, enhance compliance, and provide data analysis for smarter investment decisions.

Responsibilities: Stakeholder communication, business and system requirements gathering and analysis, specification and documentation development, prototyping, managing documentation, project planning and risk management.

Technologies: Jira, Confluence, Figma, CloudFlare, Vultr, Draw.io, Google Docs, Bizagi

Business Analyst, Healthcare Platform

Duration: 02.2022 - 03.2023

Summary: Healthcare platform with web and mobile applications allowing patients to find clinics, book appointments, leverage telemedicine features, and manage clinic operations.

Responsibilities: Business requirement analysis, functional specification identification, stakeholder communication, collaboration with development team, user acceptance testing, project documentation management, project planning, and risk management.

Technologies: XMind, ClickUp, Figma, Bizagi Modeler, Draw.io, Google Docs

Business Analyst, VR Game

Duration: 12.2021 – 02.2022

Summary: VR game development targeting both professionals and amateurs with varying levels of complexity, gambling features, and an NFT marketplace for game-related artifacts.

Responsibilities: Engagement in Discovery phase, creation of business approach, coordination of stakeholder meetings, software architecture collaboration, business process analysis and documentation, requirements elicitation, project documentation maintenance, prototyping.

Technologies: Jira, Figma, Bizagi Modeler, Draw.io, Google Docs

Business Analyst, Marketing Platform for Renting Things

Duration: 08.2021 – 10.2021

Summary: Marketing platform for renting various items, featuring ad placements, search functions, integrated communications, and process management tools.

Responsibilities: Working with stakeholders to determine business needs, process improvements, and system enhancements, requirements documentation, collaboration with development team, requirements workshops facilitation, user acceptance testing, project planning and risk management.

Technologies: Jira, Confluence, Balsamiq, Bizagi Modeler, Draw.io, Google Docs

Requirements Engineer, IoT Systems Architect and Chief Designer, Pilotless Transport Complex in the UAE

Duration: 02.2019 – 05.2020

Summary: Development of a pilot-free transport complex for the Sharjah government, focusing on clean energy consumption, high-speed transportation, and automated systems for vehicle and process management.

Responsibilities: Client negotiations, pre-sales activities, SRS development, HMI prototyping, architecture design, programming of logic controllers, supervising and implementing software in the UAE.

Technologies: 3DExperience, CODESYS v.2.3, Simple-SCADA, MS VISIO, Google Docs

Requirements Engineer, IIoT Systems Architect and Designer, Mining and Processing Complex Automation in Turkmenistan

Duration: 07.2016 – 01.2019

Summary: Automation of a mining and processing complex controlling numerous technological processes, emphasizing safety and efficiency from extraction to shipment.

Responsibilities: Development of SRS for IIoT systems, solution architecture, data network design, IIoT system design, HMI and workstation prototyping, and system supervision in Turkmenistan.

Technologies: TIA Portal, MS Office, Autodesk
