Vitalii P.
Senior Java Software Engineer

SUMMARY

- 8 years IT professional experience in software development of web-oriented applications - Experienced in Java web development in server-part applications and server maintenance - Upper-intermediate English - Available ASAP

TECHNICAL SKILLS

Main Technical Skills	Java
Programming Languages	Java, JavaScript, PL, TypeScript
JavaScript Frameworks	Angular, jQuery
Java Libraries and Tools	Apache Velocity, C3P0, Enterprise Javabeans, Java EE, JDBC, JDK Tools, Jersey, JPA, JSON, Spring Core, Spring Data, Spring Integration, Spring model-view-controller (MVC) framework
JavaScript Libraries and Tools	Canvas, Enterprise Javabeans
Java Frameworks	Hibernate, Spring, Spring Boot
Databases & Management Systems / ORM	AWS ElasticSearch, Cassandra, Firebase, Hibernate, MongoDB, MySQL, Oracle Database, Pg Admin, PostGIS, PostgreSQL, SQL
UI Frameworks, Libraries, and Browsers	Ajax, CSS, HTML, HTML5, jQuery
Cloud Platforms, Services & Computing	Firebase
Amazon Web Services	AWS Advertising API, AWS ElasticSearch
Methodologies, Paradigms and Patterns	Agile, Microservies, MVC, Scrum, SOAP, TDD
Web/App Servers, Middleware	Apache HTTP Server, Apache Tomcat, JBoss, Nginx
QA, Test Automation, Security	Apache Maven, JUnit, Mockito, Selenium Webdriver
Third Party Tools / IDEs / SDK / Services	Apache NetBeans, Eclipse, IntelliJ IDEA
SDK / API and Integrations	AWS Advertising API, eBay API, Google API, OAuth, RESTful API, Swagger, Taobao API

Operating Systems	Centos, macOS, Ubuntu, Windows
Virtualization, Containers and Orchestration	Docker, Docker Compose, Kubernetes
Codecs & Media Containers	Ffmpeg
Version Control	Git
Deployment, CI/CD & Administration	Gradle
Message/Queue/Task Brokers	Kafka, MQQT, RabbitMQ
File Systems, Storage	XML
Other Technical Skills	full ajax system, jetty websocket, Zookeper

EXPERIENCE

Back-End Developer, Automation Project

7 months
Description: Developing of an inner portal with automated functionality for a company that creates custom web pages for its customers based on WordPress. No design requirements were stated.
Technologies: HTML, CSS, PostgreSQL, Java, Spring Security, Velocity, Google Api Enginea

Back-End Developer, Cryptosmart

10 months
Description: Developing a highly secure chat, that use a combination of the most powerful encryption algorithms EC, RSA, AES that levels the weaknesses of each of them separately and guarantees 100% safety. It uses P2P encryption. So no chance and sense to hack the server or whatever.
Technologies: jetty embedded, Hibernate 5.0.1 FINAL, Spring 4.3.6 RELEASE, Playframework 2.4, EbeanORM

Back-End Developer, Soft project

11 months
Description: Corporate Website for Union of Insurers.
Technologies: Java EE, Spring MVC, Spring Security, JDBC, Oracle DB, PL/SQL, jQuery, SOAP, JavaScript, PostgreSQL, HTML, CSS
