

# Evgeniy K.

## Senior Software developer

### SUMMARY

- About 7+ years of experience in development - Data-visualization - Testing coverage - Team management - Architecture design - Docker configuration - Good skills with Adobe Photoshop/Sketch - \*nix systems preferred - Upper-Intermediate English. - Available ASAP.

### TECHNICAL SKILLS

<b>Main Technical Skills</b>	JavaScript, TypeScript, Node.js
<b>Programming Languages</b>	Java, JavaScript, TypeScript
<b>JavaScript Frameworks</b>	D3.js, jQuery, Next.js, Node.js, React
<b>JavaScript Libraries and Tools</b>	Electron, Enzyme, Mobx, NativeJS, React Native, Redux
<b>Java Libraries and Tools</b>	Freemarker
<b>Go Libraries and Tools</b>	GoJS
<b>Databases &amp; Management Systems / ORM</b>	Firebase, MongoDB, MySQL, RethinkDB
<b>UI Frameworks, Libraries, and Browsers</b>	D3.js, GoJS, Highcharts, jQuery
<b>Virtualization, Containers and Orchestration</b>	Docker
<b>Platforms</b>	Firebase
<b>QA, Test Automation, Security</b>	Jest, Mocha

### EXPERIENCE

#### Frontend developer.

February 2019 – Until now  
3 years 9 month

Working as a Lead Frontend developer in an outstaffing company. Architecture design, code review. Most usage technologies: Javascript, TypeScript, React/React Native, Redux/Mobx, NodeJS, Electron, NextJS, RestFull API, BEM, SCSS/Styled Components.

## Frontend developer, Overgear

July 2017 - February 2019

1 year 7 month

Development for an assets trading game platform - <https://overgear.com/>

During my time at Overgear, I worked with our React stack, utilizing on-demand loading of components, and dynamic admin-generated content.

My experience also included some backend work with NodeJS v 8.10 with the noSQL database RethinkDB. NodeJS, RethinkDB, React/Redux, creating UI-library, HTML/SCSS, Flexbox, Storybook

## Frontend developer, Trend Strategies LP

January 2017 - July 2017

7 month

Development websites for CPA-network. Here I worked mostly with landing pages, and partially engaged in developing an internal service for traffic tracking and analysis.

Responsive/Cross Browsing html development. HTML5, SASS, Javascript, JQuery, NodeJS

## Frontend developer, Spectre Digital Agency | Yorsh Agency

March 2016 - July 2017

1 year 5 month

I created a digital agency based university. I gathered a team of like-minded people who worked on projects for small and medium-sized businesses. Under my oversight we developed more than 20 projects, including cooperation with Raiffeisen Bank, Gazprom Media, Konstantin Khabensky Foundation, Team Empire and Mercedes representative office.

## HTML developer, Freelance

Jun 2014 - March 2016

1 year 11 month

At this time I started my way. I worked with HTML, JQuery, Bootstrap, etc. Also I worked mostly with CMS systems like Wordpress, Modx, Drupal.

## PROJECTS

### Software engineer, Teacherlists

<https://www.teacherlists.com/>

2022

**Description:** Development internal resources

**Responsibilities:**

- Project stabilization
- Implementing new features
- Server side optimization
- Implementing RestFull API's based on NodeJS and MySQL
- Working with pagination, authorization, etc...

**Technologies:** NextJS, Redux-thunk, SASS, NodeJS, MySQL, Sequelize, etc...

### Software engineer, Milkman technologies

<https://www.milkmantechologies.com/>

2021- 2022

**Description:** Development internal resources

**Responsibilities:**

- Test coverage legacy project
- Create new layouts
- Working on UI based on MUI

**Technologies:** ReactJS, React-Query, React-testing-library, MUI, etc...

## Software engineer, GN AUDIO

<https://www.jabra.com/software-and-services/jabra-engage-ai>

2021 - 2021

**Description:** Standalone application for call-centers for analyzing audio calls, controlling KPIs, see some performance data.

**Responsibilities:**

- From scratch
- Development widgets (Charts, Tables, Ui-KIT, D&D lists)
- Working on data-flow (requests, store, data-structures, normalization, virtualization, lazy-loading, etc)
- Etc...

**Technologies:** ReactJS, Electron, Mobx, SCSS, Ant-design, etc

## Front End Developer, GAMIGO

<https://en.gamigo.com/>

2020 - 2021

**Description:** Web Shop for studio games. Internal CRM system for content management

**Responsibilities:**

- Working on legacy project
- Including new templates for new games
- Fixing problems, working on optimization existing codebase
- Working on admin panel from scratch based on React, Redux, etc
- Implement new design features

**Technologies:** Native JavaScript, JQuery, Freemarker, Java, React, NextJs, TypeScript, etc...

## Full stack developer, HOTELS APP

2020

**Description:** Property management system for hotels. Includes Dashboard, mobile services, etc...

**Responsibilities:**

- From scratch
- Architecture design
- Development Dashboard, widgets, etc...
- Development Restful API for all services: Mobile, Web
- Code-review
- Business-planning
- Implementing 3rd party authorization with OAuth2

**Technologies:** TypeScript, NodeJS, MongoDB, Koa, React, Mobx, Styled-components, etc

## Front End team lead, SKUAD FNS

2019 – 2021

**Description:** Analysis and analytics system

**Responsibilities:**

- Front end architecture design from scratch
- Front end team management
- Development huge data-visualization widgets (Graph, Chart, etc)
- Development microservices based on NodeJS
- Code review, team building, team training
- Tasks management, publication setup
- Investigation business tasks, task-splitting
- Recruiting new employers
- Employee training programs

**Technologies:** TypeScript, ReactJS, Electron, Redux, Redux-thunk, Reselect, HTML, SCSS, GoJS, D3, Jest, NodeJS etc...

## Front End Developer, EMEA JLL

<https://www.jll.com/>

2019 – 2020

**Description:** Real-estate management system

**Responsibilities:**

- Development new features
- Refactoring and bug-fixing existing features
- Development export to pdf feature
- Project performance review and optimization
- Close cooperation with Backend developers

**Technologies:** TypeScript, ReactJS, Redux, Redux-thunk, HTML, Styled-components, etc...

## Full Stack Developer, Team Empire | Promo

<http://empire.agency/st>

2019 - 2021

**Description:** Few promotional apps for Cybersport organization

**Responsibilities:**

- Development RestFull API
- Development Prize drawing system
- Working on UI
- Integration different animation widgets (Lightning, Smoke effects, Models-animation)

**Technologies:** TypeScript, ReactJS, React Native, Redux/Mobx, Firebase, NodeJS, HTML, SCSS, etc...

## Front End Developer, Overgear | Gaming platform

<https://overgear.com/>

2017 – 2019

**Description:** B2B/B2C trading platform for gamers

**Responsibilities:**

- Development own design system (UI, Widgets, Modules, etc)

- Development widgets for page building based on configs
- Including CodeMirror, Storybook
- Fixing bugs
- Development new business features
- Working on SSR with Next.JS
- Store-optimization, performance review

**Technologies:** ReactJS, Redux, Redux-thunk, NodeJS, HTML, SCSS, RethinkDB, PropTypes, etc...

### **Front End Developer, TUI | Travel website**

<https://www.tui.com/>  
2018

**Description:** Traveling website (2 Month)

**Responsibilities:**

- Development mobile version for all existing project
- Bug fixing
- Performance review
- Working on SSR

**Technologies:** JavaScript, ReactJS, Redux, Redux-thunk, HTML, PostCSS, etc...

### **Front End Developer, BGMP | lawyer company website**

<http://bgmp.ru/>  
2017

**Description:** Corporate lawyer website

**Responsibilities:**

- Development front end part
- Including WordPress CMS
- Technical supporting
- Bug fixing

**Technologies:** HTML, SCSS, Gulp, Bootstrap, JQuery, WordPress CMS

### **Front End Developer, Knedlik | LP for travel mobile APP**

<http://knedlik.me/>  
2016

**Description:** Traveling application

**Responsibilities:**

- Development promo landing page
- Deployment to hosting
- Technical supporting

**Technologies:** HTML, SCSS, Gulp, Bootstrap, JQuery

### **Front End Developer, Oncobrain | Information portal**

<https://oncobrain.ru/>  
2016

**Description:** Information portal

**Responsibilities:**

- Critical bugs fixing
- Wordpress development
- Technical supporting

**Technologies:** HTML, SCSS, Gulp, Bootstrap, Masonry, JQuery, ModX CMS

## EDUCATION

**Master's of Customs**

Plekhanov Russian University of Economics

Sep 2012 – Jul 2017
