Renato V.
Architect/Team-lead OutSystems Tech Lead / OutSystems Senior Developer

SUMMARY

- Experienced software engineer with 16 years in the IT industry, including 6 years dedicated to the OutSystems platform.
- Extensive expertise in software development and architecture. Strong understanding of technology and ability to design and implement OutSystems-based solutions.
- Knowledge and experience in various technologies such as Java, Oracle, SAP Netweaver (PI, NWDS, WAS), and SAP GRC NFe.
- Has experience leading teams of 4-16 team members
- Skilled in Agile methodologies and experienced in leading development teams.
- Successfully delivered high-quality projects and demonstrated leadership skills.
- Has OutSystems Tech Lead, Web, Associate, and Reactive Developer certifications
- Upper-Intermediate English.

TECHNICAL SKILLS

Main Technical Skills	OutSystems (6 yr.)
Programming Languages	Java
Java Frameworks	Hibernate, Spring, Struts
Java Libraries and Tools	Jasperreports
Databases & Management Systems / ORM	Hibernate, Microsoft SQL Server, Oracle Database
Methodologies, Paradigms and Patterns	Agile, ITIL
Deployment, CI/CD & Administration	DevOps
Platforms	OutSystems (6 yr.)
Project Management & Administration	Scrum Master
UI/UX/Wireframing	UX Design

WORK EXPERIENCE

OutSystems Tech Lead, Radsoft

Jul 2023 - Now

OutSystems Tech Lead, Cloud Development Resources

02.2022 - 07.2023

Responsibilities:

- Led a team of developers in creating the Fact Finder application for the client Federated Mutual Insurance.
- Collaborated closely with stakeholders to understand and translate project requirements into technical specifications.
- Played a key role in successfully delivering the Fact Finder application, ensuring its functionality and usability.
- Oversaw the development process, ensuring adherence to project timelines and quality standards.
- Demonstrated strong leadership skills by managing and motivating the development team throughout the project.
- Subsequently worked on the Fusion Validations project, where we implemented qualitative validations for the data generated within the Fact Finder application.
- Developed innovative solutions to enhance data quality and improve overall system performance.
- Collaborated with cross-functional teams to gather insights and refine the validation processes.
- Actively participated in code reviews, identifying areas for improvement and implementing best practices.
- Successfully delivered the Fusion Validations project, meeting all project objectives and client expectations.

Team Size: from 4 to 16

Team Composition: Tech Lead, Developers, Engagement Manager, QA, UI/UX, Business Analyst, Release Manager.
