Main Technical Skills	Usability tests (1 yr.), API testing (1 yr.), Azure Cloud Functions (1 yr.), QA Automation (1 yr.), Swagger (1 yr.)
Azure Cloud Services	Azure Cloud Functions (1 yr.)
QA, Test Automation, Security	API testing (1 yr.), QA Automation (1 yr.), Usability tests (1 yr.)
SDK / API and Integrations	API testing (1 yr.), Swagger (1 yr.)

WORK EXPERIENCE

Software Tester - Ogmaconceptions Pvt Ltd. (Credit Genius)

Duration: 2025/04 – Present

Summary:

- Credit Genius is a financial management and credit monitoring application designed to help users track their credit scores, manage bills, and improve their financial health
- The app provides real-time credit updates, personalized insights, and recommendations to enhance users' creditworthiness
- It also allows secure integration with bank accounts and credit bureaus for accurate data analysis

Responsibilities:

- Execution of the test cases on mobility app
- Conducted functional, UI, and regression testing across web and mobile platforms
- Prepared and executed test scenarios, test cases, and bug reports using Jira
- Performed API testing to validate credit score retrieval and transaction APIs

- Ensured data accuracy and security validation during credit report generation
- Collaborated with the development team to identify, reproduce, and resolve issues

Technologies: Jira, Swagger, Android application, Excel, Notepad, Firebase application

QA Tester - Ogmaconceptions Pvt Ltd. (Valumate AI)

Duration: 2025/04 – Present

Summary:

- Valumate is a business valuation and financial assessment application designed to calculate the fair market value of companies based on financial, operational, and market data
- It helps users generate accurate valuation reports for investment, audit, and compliance purposes

Responsibilities:

- Conducted functional, UI, and database testing to ensure valuation accuracy and data integrity
- Designed and executed test scenarios and test cases covering different valuation models and user workflows
- Performed API testing for financial data integration and validation
- Reported and tracked bugs using Jira, ensuring timely fixes and regression checks
- Verified PDF report generation, data calculations, and user access control features

Technologies: Jira, Swagger, Excel, Notepad, Firebase application, Android application

QA Tester - Ogmaconceptions Pvt Ltd. (Ace Grease)

Duration: 2025/04 – Present

Summary:

- Ace Grease is an industrial waste management and recycling application that streamlines the collection, tracking, and processing of used cooking oil and grease from commercial sources
- The system ensures compliance with environmental standards and provides real-time tracking of waste collection and conversion processes

Responsibilities:

- Performed functional, integration, and API testing to validate end-to-end waste tracking and reporting
- Designed and executed manual test cases and scenarios covering collection, logistics, and conversion workflows
- Conducted UI and regression testing to ensure smooth user experience and accurate data flow
- Reported, tracked, and retested defects using Jira, ensuring timely resolution
- Verified data synchronization between web and mobile platforms

Technologies: Jira, Swagger, Excel, Chrome web

Software Tester - Ogmaconceptions Pvt Ltd. (TEORU (Web Application))

Duration: 2025/04 – Present

Summary:

- TEORU is a responsive web application designed to provide users with a seamless online experience for accessing services, managing information, and interacting with the platform
- The project focuses on ensuring high-quality user experience across multiple browsers and devices

Responsibilities:

- Performed manual testing of the Teoru web application
- Executed functional, UI, and regression testing
- Created and executed test cases based on business requirements
- Identified, reported, and tracked defects using Jira
- Verified bug fixes and performed retesting
- Conducted cross-browser and responsive testing
- Validated user authentication and form validations
- Collaborated with developers and business analysts to ensure quality delivery
- Participated in Agile sprint planning, daily stand-ups, and QA reviews
- Ensured the application met quality standards before production release

Technologies: Jira, Chrome web, Edge, Swagger, Excel

Software Tester - Ogmaconceptions Pvt Ltd. (Raktabandhan (Blood Donation Application & web admin))

Duration: 2025/04 – Present

Summary:

- Raktabandhan is a blood donation application and web admin platform designed to facilitate donor and recipient management, blood request tracking, and donation history
- The system aims to streamline blood donation processes and improve accessibility

Responsibilities:

- Analyzed business requirements and prepared test scenarios and test cases
- Performed end-to-end functional testing of donor, recipient, and blood request modules
- Validated user registration, login, profile management, and authentication flows
- Tested blood search, blood request creation, donation history, and request tracking features
- Executed Smoke, Sanity, Regression, and Retesting for every build release
- Identified, documented, and tracked defects using Jira
- Verified bug fixes and ensured defects were resolved before production deployment
- Conducted UI, usability, form validation, and responsive testing across multiple browsers and devices
- Participated in Agile Scrum ceremonies, including sprint planning, daily stand-ups, and sprint reviews
- Collaborated with developers and business analysts to deliver a high-quality application

Technologies: Trello, Chrome web, Excel
