

Hiring software engineer as easy as calling a taxi.

Evgeniy M. Java Engineer

SUMMARY

- 4+ years of IT industry experience
- Development of internal functionality, testing and bug fixes
- Upper-Intermediate English
- Available ASAP

SKILLS

Main Technical Skills	Java
Programming Languages	C, Groovy, Java
Java Libraries and Tools	Freemarker, JavaFX, Java Server Pages (JSP), Java Servlets, JDBC, JPA,Slf4j, Spring Cloud
Java Frameworks	GWT, Hibernate, Jhipster, Spring, Spring Boot
JavaScript Frameworks	GWT
Mobile Frameworks and Libraries	Mockito
Databases & Management Systems / ORM	AWS ElasticSearch, Hibernate, Liquibase, MySQL, Oracle Database, PostgreSQL, Redis
Cloud Platforms, Services & Computing	AWS, Spring Cloud
Amazon Web Services	AWS ElasticSearch
Methodologies, Paradigms and Patterns	Agile, Scrum
Web/App Servers, Middleware	Apache HTTP Server, Apache Tomcat
QA, Test Automation, Security	Apache Maven, Gatling, JUnit, Mockito, Postman
SDK / API and Integrations	API, RESTful API

Third Party Tools / IDEs / SDK / Services	Eclipse, IntelliJ IDEA
Version Control	Git, GitLab
Deployment, CI/CD & Administration	Gradle, Kubernetes
Platforms	Jhipster
Collaboration, Task & Issue Tracking	Jira, Redmine
Message/Queue/Task Brokers	Kafka
Virtualization, Containers and Orchestration	Oracle VM VirtualBox
Other Technical Skills	CI, R2DBC, Reactor, SCMs, Spring Reactor, Trackers, XM

EXPERIENCE

Java developer, Logistic Management

2020 - 2021

Description: High-loaded system for calculating delivery options, dates, price, etc. Accent on throughput and latency of the system. Responsible for service development, performance analytics, and integration with third-party API and DB. Engaged in architecture discussion, responsible for development decisions.

Technologies: Java 11, Spring, Spring, Reactor, Hibernate, R2DBC, Redis, Gradle, Oracle DB, PostgreSQL, Kafka, Kubernetes, Spring Cloud, Gatling.

Java developer, Contact Center

2019 - 2021

Description: A web application for the Contact Center of one of the biggest retail companies in Ukraine.

Web application for operators of Customers Contact Center. App provides a full service of interactions with logistics, accounting, service departments, online and offline shops. The system was integrated with the Client's database and external telephony system. Development of internal functionality. Testing and bug fixes.

Technologies: Spring Boot, Jhipster, Hibernate, Liquibase, Oracle, REST, Groovy, Java 11.

Java developer

2019

Description: Development of internal functionality. Testing and bug fixes. Responsible for technical research, implementing functional layers of technical solutions. Regular meetings and communication with the customer

Technologies: XM, REST, Groovy, Java 8.

Java developer

2019

Description: ERP system of a large international tobacco company. The online service allows you to automate the management of the process of transporting goods from the company's warehouses to distributors' warehouses using ground transportation from third-party transport companies. The developed service will allow you to track in real-time all the cars of all transport companies that are currently transporting cargo, as well as calculate and display the estimated time of arrival of the car to each unloading point and store the movement history of each car.

Technologies: XM, REST, Groovy, Java 8.

Java developer

2018 – 2019

Description: Web application for a cloud-based and multi-tenant business support system for service providers and other businesses. Open-source project: <https://github.com/xm-online>. Development of internal functionality. Testing and bug fixes.

Technologies: XM, REST, Groovy, Java 8.

Java developer

2018

Description: Responsible for back-end project development. Development of internal functionality. Testing and bug fixes.

Technologies: XM, REST, Groovy, Java 8.

Java developer

2018

Description: The store marketplace desired to connect end-users with small stores in the city. Provides store search capabilities. Consists of two user interfaces - one is a public site accessed by end-users and the second is the admin interface for content and user management. Both interfaces use the same backend.

Technologies: Spring Boot, Jhipster, Hibernate, Liquibase, Mysql, REST.

EDUCATION

Specialist degree in Telecommunications and Information Security, National Aviation University of Ukraine

2006 – 2012
