Shashank
Middle Front-End Software Engineer (Angular.JS + React)

SUMMARY

- 6+ years of experience in the IT industry - 5+ years of experience with Angular - 2 years working with Angular.JS 1.x - Fluent English - Available ASAP

TECHNICAL SKILLS

Main Technical Skills	AngularJS (2 yr.), React (2 yr.)
Programming Languages	C#, JavaScript, PHP
JavaScript Frameworks	Angular, AngularJS (2 yr.), Backbone.js, Express, jQuery, Node.js, React (2 yr.)
JavaScript Libraries and Tools	Angular CLI, Angular flex-layout, Angular JWT, Grunt, Gulp.js, NPM
.NET Platform	ASP.NET MVC, Entity Framework
Java Libraries and Tools	JSON
PHP Frameworks	Laravel
Databases & Management Systems / ORM	Microsoft SQL Server, MySQL
UI Frameworks, Libraries, and Browsers	Ajax, Angular Material UI, Bootstrap, CSS, DHTML, HTML, jQuery, XHTML, XSLT
Cloud Platforms, Services & Computing	AWS
Scripting and Command Line Interfaces	Angular CLI
Version Control	BitBucket, Git
Collaboration, Task & Issue Tracking	Jira
Operating Systems	Linux
Third Party Tools / IDEs / SDK / Services	Microsoft Visual Studio Code, Notepad++, Sublime Text
QA, Test Automation, Security	Postman
	RESTful API

SDK / API and Integrations	
File Systems, Storage	XML
Other Technical Skills	Bower, MSNAgile

EXPERIENCE

Front End Software Engineer

05.2020 - 01.2021

Description: This is an Eircode based Business Directory & Classifieds Website that will offer and encourage site visitors to use local sellers, trades & businesses. Users can register for free or purchase subscriptions and place their classifieds. Each user will get few credits every month which will be used to post classifieds. After expiring these credits they will have to pay for every classified. All the posted classifieds or adverts will show on the website.

Responsibilities:

Features implemented for:

Admin:

• Add/edit/delete users

• View all companies or users registered on the website

• Add/update/delete terms and conditions

• Review report(if any user reported another user) and take action(block a user or disable the user

• Add/Edit/Delete/Categories

User:

• Register and purchase subscription

• Place/edit/view advertisement

• Ping and post(notification will send to all users in given distance)

• Advert listing(filters on the basis of location,eircode,distance,categories,date,tags)

• Business listing(filters on the basis of location,eircode,distance,categories,date,tags)

• Edit/delete(account details/company details)

• Forget/reset password

• View live feeds(list of all post and advertisements)

• Make query for company or adverts/report user

Technologies: React, HTML, CSS, Bootstrap, Laravel, Msnagile, REST, AWS, POSTMAN

Front End Software Engineer, Sports Management System

05.2020-02.2021

Description: The client has created a platform to learn how to skate and bike via a cutting-edge curriculum at our SBSX academies, where students can learn the basics and progress to expert levels: Zero to Hero. If you do not need instruction, SBSX also schedules Time Trials and special events year-round to allow skateboarders (even longboarders), and bikers to compete against each other. If you don't know how to skate or bike and want to join the fun, time trials events set aside time for scooters, and inline skates to join in on the action.

Responsibilities:

- Development of new application in AngularJs 1 and HTML5
- Creation and proper implementation of client requirements.
- Worked effectively with the design team to ensure software solutions elevated client-side experience.
- Participated in Design, Development sprints.
- Participated in Daily Stand Up.

Technologies: AngularJs x.1, Angular Material, Angular flex-layout, Angular JWT, HTML, CSS, Bootstrap, PHP, AWS, REST, POSTMAN

Front-End Software Engineer, eCommerce Application

05.2019 - 11.2020

Description: A multi-vendor eCommerce application that has multiple portals like Admin, Seller, and Buyer. The seller can create his/her account and add products for sale, the buyer can do guest checkout as well as create his/her account to purchase the product.

Responsibilities:

- Involved in designing the user experience interface UI/UX strategy, UI requirements, converting findings into UI designs.
- Leveraged MVC design pattern to organize Angular controllers, Custom directives, factories, and views.
- Worked on the REST/Web API to create the services and tested on postman and used in Angular $HTTP service calls and binds the data in the table using ng-repeat attributes.
- Built web pages that are more user-interactive using jQuery plug-in for Drag and Drop, AutoComplete, AJAX, JSON, Angular JS, and JavaScript, Bootstrap.
- Used Angular as a framework to create a Single Page Application (SPA) which can bind data to specific views and synchronize data with the server using Sass, LESS, Bootstrap, AngularJS.
- Used Bitbucket for version control and MSNAGILE for defect tracking.
- Experience in CSS pixel-level layout, consistency with browsers, Version, and Platform Independence.
- Developed Web applications and Web Services using MVC, Entity Framework, HTML5, CSS3, JavaScript, JQuery, AND Angular.
- Created animation effects during the data load, waiting for the Ajax response using JQuery.
- Interact with other developers and end-users to design and implement new features throughout the framework.
- Debugging using firebug and web developer tools on Chrome, Firefox, and Internet Explorer.

- Prototyped several versions of possible UI approaches to provide choices to the business.
- Used jQuery, a cross-browser JavaScript library to dynamically update the page content on the client-side.
- Developed web pages using HTML/CSS and JavaScript.
- Integrated Payment gateway.

Technologies: AngularJs 9, Angular Material, Angular flex-layout, Angular JWT, HTML, CSS, Bootstrap, PHP, MSNAGILE, AWS, REST, POSTMAN
